ZRA	Zambia Revenue Authority

INTRODUCTION

Background

The Extractive Industries Transparency Initiative (EITI) is a global coalition of governments, companies and civil society working together to improve transparency and accountability in the management of revenues from natural resources. EITI issued a new global standard for transparency in the oil, gas and mining industries in July 2013 (the “EITI Standard”). The EITI principles are based on the belief that prudent use of natural resources contributes to economic growth, sustainable development and reduction of poverty in resource-rich countries.

Zambia joined EITI as candidate in May 2009 and became fully compliant on 19 September 2012. To date four (4) annual EITI Reports have been produced covering the period from 1 January 2008 until 31 December 2011.

This is the fifth Zambia Extractive Industries Transparency Initiative (ZEITI) reconciliation report, which covers the period from 1 January to 31 December 2012. Zambia’s next validation is due before 1 July 2016¹.

Objective

The purpose of this Report is to reconcile the data provided by companies in the extractive sector (hereafter referred to as “Companies”) with the data provided by relevant Government Ministries and Entities (hereafter referred to as “Government Entities”).

The overall objectives of the reconciliation exercise are to assist the Government of Zambia in identifying the positive contribution that mineral resources are making to the economic and social development of the country and to realise their potential through improved resource governance that encompasses and fully implements the principles and criteria of the Extractive Industries Transparency Initiative.

Nature and extent of our work

We have performed our work in accordance with the International Auditing Standards applicable to related services (ISRS 4400 Engagements to perform agreed upon procedures regarding Financial Information). The procedures performed were those set out in the terms of reference as established in the Request for Proposal and approved by ZEC.

The reconciliation procedures carried out were not designed to constitute an audit or review in accordance with International Standards on Auditing or International Standards on Review Engagements and as a result we do not express any assurance on the transactions beyond the explicit statements set out in this report. Had we performed additional procedures other matters might have come to our attention that would have been reported to you.

The report consists of seven (7) chapters presented as follow:

- Executive Summary;
- Methodology and approach to the reconciliation process;
- Description of the contextual information on the industry;
- Determination of the reconciliation scope;
- Reconciliation results of reported data;
- Analysis of reported data; and
- Findings, recommendations for improvement of the future reconciliation processes.

Reported data disaggregated by individual companies, Government Entities and revenue streams, are included as appendices to the report. The amounts in this report are stated in Zambian Kwacha (ZMW), unless otherwise stated.

Our report incorporates information received up to 18 December 2014. Any information received after this date is not, therefore, included in our report.

¹ See <http://www.zambiaeiti.org/> for more information about EITI in Zambia.

1. EXECUTIVE SUMMARY

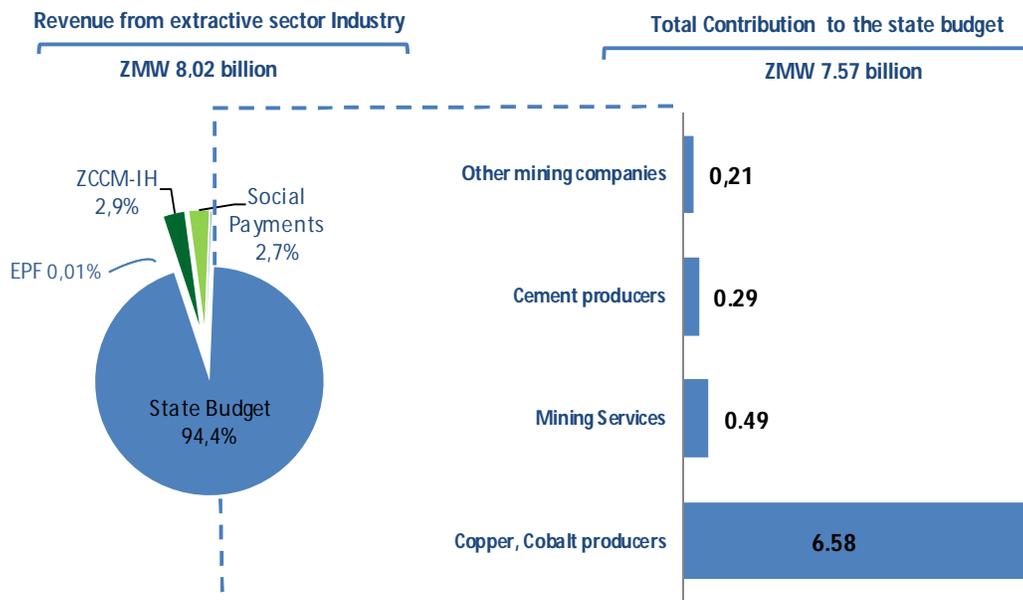

This report summarises information about the reconciliation of fiscal and non-fiscal revenue from the extractive industry in Zambia as part of the implementation of the Extractive Industries Transparency Initiative (EITI). In this context, extractive companies and Government Entities report payments and revenue respectively. In addition; this report includes a reconciliation of revenues collected by the State Owned Company-“ZCCM-IH” from extractive companies and the cash flows contributed by ZCCM-IH to the state budget.

1.1. Revenue Generated from the Extractive Industries

The receipts reported by the government in 2012, after reconciliation, may be depicted as follows:

Contribution to the State Budget

According to the data collected from Government Entities, after reconciliation work, revenue generated from the extractive industry totalled ZMW 8.02 billion. This revenue includes dividends of ZMW 233 million collected by ZCCM-IH from its subsidiaries which operate in the mining sector, social payments amounting to ZMW 218 million paid by extractive companies and payments to the Environmental Protection Fund (EPF) amounting to ZMW 1 million collected by the MMEWD from extractive companies

The State budget recorded payments of ZMW 7.57 billion or 94.4% of total cash flows from the extractive industry in 2012. The largest share is derived from the copper and cobalt producers, contributing 86.92% of the State's total mining budget.

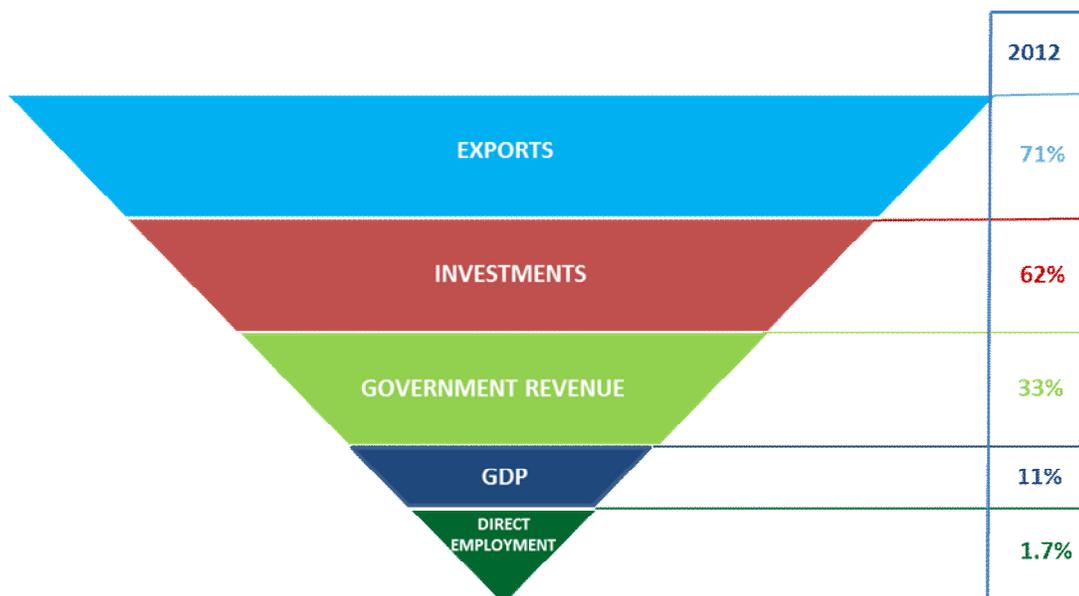

Evolution and structure of revenues

Government Revenues from the extractive sector decreased from ZMW 8.67 billion in 2011 to ZMW 8.02 billion in 2012. This decrease of ZMW 0.65 billion is explained in the table below:

Revenue streams (in million ZMW)	2011 ²	2012	Variance
Company Income Tax (Inc. Provisional Tax)	3 291	2 730	(561)
Mineral Royalty	1 466	1 476	10
Import VAT	797	1 423	626
Other payments to the budget	995	870	(125)
Contribution to GRZ budget (excluding Pay)	6 549	6 499	(50)
Pay as you Earn	955	1 067	112
Contribution to the State Budget (a)	7 504	7 566	(62)
Payments to the EPF (b)	30	1	29
Sale of participations	814	-	814
Dividends	116	233	118
Price participation fees	97	-	(97)
Dividends received by ZCCM-IH (c)	1 027	233	794
Social payments (d)	107	218	(111)
Total revenue from extractive sector (a+b+c+d)	8 668	8 019	648

National Contribution

Based on the data gathered and set out in Section 3 of this report, Zambia is still highly dependent on mining as its major productive industry. Zambia broadly conforms to the inverted pyramid pattern of macroeconomic contributions with very high contributions in some macro areas (notably exports and investment) but progressively lower contributions in other areas such as government revenues, GDP³ and Direct Employment.

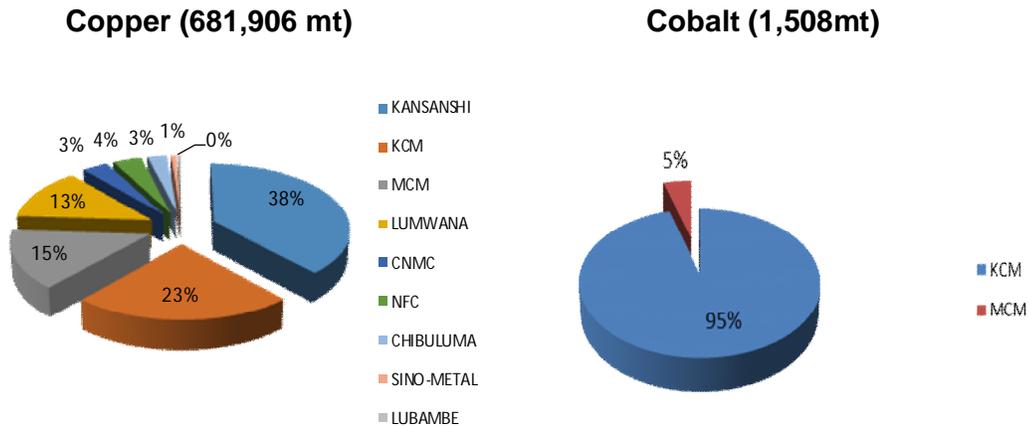

² 2011 ZEITI Report

³ In current prices

1.2. Production and Exports

Production⁴

According to data provided by the large scale mining companies, copper and cobalt are the key commodities extracted in Zambia. In 2012, the production was 681,906 metric tonnes of copper and 1,508 metric tonnes of cobalt.

As shown in the charts above, the four largest mining companies in Zambia, Konkola Copper Mines and Mopani Copper Mines from the Copperbelt province and FQM Kansanshi and Barrick Lumwana from North-Western province, account for over 85% of copper production in Zambia. The production data for the other commodities extracted is set out in Section 6 of this report.

Exports⁵

The mining sector accounts for 70.7% of exports revenue in 2012 with a large contribution of copper mining which accounts of over 96.8% of the sector exports as shown below:

	2012 (US \$ million)
Metal exports	6,497.6
Copper exports	6,294.5
Cobalt exports	203.1
Zambia Exports (f.o.b)	9,191.1
Contribution of mining sector	70.7%

(Source: Bank of Zambia, 2013, p. 23; Balance of payments 2011-2012)

⁴ Toll purchased and imported production excluded

⁵ Including imported and purchased production

1.3. EITI Scope

Payment flows and data reported

The report covers payments made by extractive companies and revenues received by Government entities and other material payments and benefits to Government Entities as detailed in the Section 4.3.1.

The report also covers mining production, export sales, social payments and loans provided to mining companies.

Reporting entities

All companies operating under an exploration license in oil and gas or a mining license and which make payments to ZRA in excess of ZMW 1 million (approx. USD 170,000) were required to report their payments to us in accordance with the EITI Standard. As a result, cash flows reconciled for the extractive sector represent 99.89% of revenue flows from the mining sector collected by ZRA. The selection resulted in 30 mining companies. These companies are listed in Section 4.3.2 of this report.

For mining entities, including those operating in artisanal mining sector, which have made payments below the ZMW 1 million threshold to ZRA, cash flows are included in this report through unilateral disclosure by Government Entities and ZCCM-IH. The revenues collected from these companies which were submitted by MMEWD and ZRA during the scoping phase are detailed in Section 6.1.5 of this report.

Based on the list of mining companies and payment streams included in the scope, all Government Entities involved in revenue collection were required to report under the EITI Standard. These entities are listed in Section 4.3.3 of this report.

1.4. Completeness and Accuracy of Data

Data submission

All companies included in the reconciliation scope have returned their reporting templates, except ZAMBEZI PORTLAND CEMENT LIMITED. The receipts reported by Government Entities in respect of this company amounting to ZMW 43 million accounts for only 0.53% of the total extractive sector revenue.

All Government Entities included in the reconciliation scope have returned their reporting templates.

Details of the reporting templates submission by reporting entity and by date are set out in Annex 2 of this report.

Data Certification

Of the 30 companies included in the reconciliation scope, 27 companies have submitted their reporting templates signed by management, of which only 6 companies have submitted a certified reporting template signed by an external auditor. These companies are listed in the table below:

Company	Government receipts (ZMW million)
Kansanshi mining plc	3,590
Mopani copper mines plc	818
Lumwana mining company limited	538
Chibuluma mines plc	209
Lubambe copper mine limited	106
Maamba collieries limited	23
Total	5,283

The receipts reported by Government Entities in respect of the above companies were, ZMW 5.28 billion accounting to 66% of the total extractive revenue.

With regard to Government Entities, we have not received a letter from the Auditor General confirming that the accounts of the Government Entities were audited under International Standards, as defined in the instructions for the preparation of Reporting Templates.

Only the Ministry of Lands have not submitted a reporting template signed by an authorised officer. Only seven (7) Local Councils have submitted reporting templates certified by the local Government Auditor. These Local Councils are listed as follows:

Local Councils
Kalulushi Municipal Council
Kitwe City Council
Chililabombwe Municipal Council
Luanshya Municipal Council
Chingola Municipal Council
Ndola City Council
Lufwanyama District Council
Total

Details of submission of the certified reporting templates by reporting entities are set out in Annex 2 of this report.

Mainly due to challenges faced with external auditors in providing audit certificates, the Zambia EITI Council (ZEC) made a decision that where audit certificates are not available, reliance will be placed on management sign off to ascertain the validity of the data reported.

On this basis, and except for the effects of the matters described above, we can reasonably conclude that this Report duly covers the significant contributions made, in 2012, by mining companies to the revenues of Zambia.

1.5. Reconciliation of Cash Flows

Moore Stephens has been engaged to reconcile the taxes reported by the extractive companies and the Government Entities in order to identify and clarify any potential discrepancies in the reporting. Section 5 of this report presents the reconciliation results at aggregated level. Individual tax templates by company showing the reconciliation are presented in Annex 8 of this report. The table below presents a summary of the cash flow reconciliation.

Cash flows reconciliation

By the date of this report, cash flows were reconciled to 98.8% of total cash flows reported by the Government. The net unreconciled amount is ZMW (93) million or (1.2%) of the total extractive revenue.

Aggregated payments (ZMW million)	Initial reporting	Adjustment	Adjusted amount
Allocated to the State budget			
Mining companies (I)			
Extractive companies	7,346	109	7,454
Government	7,484	64	7,548
Discrepancy	(139)	45	(94)
ZCCM-IH (II)			
ZCCM-IH	8	-	8
Government	7	-	7
Discrepancy	1	-	1
Total allocated to the state budget (I+II)=(a)			
Extractive companies and ZCCM-IH	7,353	108	7,462
Government (i)	7,492	64	7,555
Discrepancy	(138)	45	(93)
Revenue from other companies (ii) (*)	11	-	11
Contribution to the state budget (i+ii)	7,503	64	7,566
Environmental Protection Fund (b)			
Extractive companies	2	(0)	2
Government	1	1	1
Discrepancy	1	(1)	1
Allocated to ZCCM-IH (c)			
Extractive companies	211	22	233
ZCCM-IH	233	-	233
Discrepancy	(22)	22	-
Total reconciled figures (a)+(b)+(c)			
Extractive companies	7,566	131	7,697
Government (iii)	7,725	65	7,790
Discrepancy	(159)	66	(93)
Social Contribution (iv) (**)	218	-	218
Government, ZCCM-IH and other beneficiaries (ii+iii+iv)	7,955	65	8,019

(*) unilateral disclosure from extractive companies

(**) unilateral disclosure from government agencies

These unreconciled differences are mainly due to the lack of details by receipt number of "Import VAT" and "Import/Customs Duty" declared by some extractive companies.

18 December 2014

2. APPROACH AND METHODOLOGY

The reconciliation process related to the EITI reporting consisted of the following steps:

- scoping study to determine the scope of the reconciliation exercise and to update the reporting template
- collection of payment data from Government Entities and extractive companies which provide the basis for reconciliation;
- comparison of amounts reported by Government Entities and extractive companies to determine if there are differences between what the authorities report as being received and the licensees report to have paid in taxes; and
- contact with Government Entities and extractive companies to resolve the discrepancies.

2.1. Scoping Study

In accordance with our terms of reference, we carried out a scoping study and reported to ZEC on matters which should be considered in determining the coverage of the 2012 reconciliation, including:

- materiality threshold for receipts and payments;
- taxes and revenues to be covered;
- companies and Government Entities to be included in the report; and
- assurances to be provided by reporting entities to ensure the credibility of the data made available to us.

The results of the scoping study were submitted to ZEC for approval as described in Section 4 of this report.

2.2. Data Collection

We developed instructions, including reporting templates and reporting guidelines, requesting mining companies and Government Entities to report all required data in accordance with ZEITI regulations. These reporting templates were sent electronically to the stakeholders.

The extractive companies and Government Entities were required to report directly to the reconciler, to whom they were also requested to direct any questions on the reporting templates.

ZEC agreed that the deadline for submission of the certified reporting templates (soft copies and hard copies) would be 5 September 2014.

2.3. Reconciliation and Investigation of Discrepancies

The process of reconciling the data and investigating discrepancies was carried out between 16 September and 24 October 2014. In carrying out the reconciliation, we performed the following procedures:

- Figures reported by extractive companies were compiled item by item and compared against figures reported by Government Entities. As a result, all discrepancies identified have been listed item by item in relation to each Government Entity and mining company;
- Where data reported by mining companies agreed with those reported by Government Entities, the Government figures were considered to be confirmed and no further action was undertaken; and
- The Government Entities and the companies were asked to provide supporting documents and/or confirmation for any adjustment to the information provided on the original data collection templates.

In cases where we were unable to resolve discrepancies, we contacted and arranged meetings with the reporting entities and reviewed additional supporting documentation evidencing the payments declared. In certain cases, these differences remained unresolved. The results of our procedures are presented in Section 5 of this report.

2.4. Reliability and Credibility of Data Reported

In order to comply with EITI Requirement 5.2 and to ensure the credibility of data submitted:

- companies and Government Entities were requested to sign their reporting templates by a Senior Official;
- companies and Government Entities were requested to submit the breakdown of payments by date and by receipt in the supporting schedule;
- companies, including ZCCM-IH, were requested to provide us with confirmation of the truth and fairness of the information disclosed in the template from their auditors, and that the information disclosed was prepared in accordance with the template instructions. The information provided by companies in this respect is set out in Annex 2;
- Government Entities, including local councils, were requested to obtain confirmation from the Auditor General that the transactions reported in their templates are in accordance with instructions issued by ZEITI, are complete and are in agreement with the accounts of the Government for the year 2012. The information provided by Government Entities in this respect is also set out in Annex 2;
- the Auditor General was also required to provide a letter confirming that the accounts of the Government Entities were audited in accordance with international standards; and
- for any changes made to the original data reported in the templates, the Government Entities and companies were asked to provide supporting documents and/or confirmation before any adjustments.

2.5. Basis of Reporting

The reconciliation has been carried out on a cash basis. Accordingly, any payment made prior to 1 January 2012 or after 31 December 2012 have been excluded.

For payments made in foreign currency, the reporting entities were required to report in the currency of payment. The payments made in US Dollars have been converted to ZMW at the average rate for the period per Oanda of USD 1: 5,06637⁶.

⁶ <http://www.oanda.com>.

3. CONTEXTUAL INFORMATION ON THE EXTRACTIVE INDUSTRY

3.1. Oil and Gas Sector

3.1.1. Oil and gas sector review

Zambia is richly endowed with mineral resources and is one of the largest producers and exporters of copper in Africa. However it has also been increasingly engaged in a quest for its petroleum reserves. Zambia started embracing this vision in the early 1970's as a result of the rise in price of crude oil on the international markets, and the dwindling revenue from the country's copper exports⁷.

Historically, the country has had two major exploration programmes by Mobil and Placid Oil undertaken between 1986 and 1991 within the Luangwa Rift Valley. One was terminated before intersecting the most favourable reservoir horizons. Considerable thicknesses of littoral and continental sediments underlain by carbonaceous rocks with oil generating potential are present within the Karoo-age graben of both the Luangwa and Mid-Zambezi Valleys. Recent exploration work for petroleum covering parts of North-Western, Western and Eastern Provinces of Zambia, using the Microbial Prospecting for Oil and Gas technique, indicated that the Okavango and North Luangwa basins have potential for oil and gas. The Government has tendered the oil blocks for oil and gas prospecting by private sector.

3.1.2. Legal Framework

The fundamental law governing upstream activities is the Petroleum (exploration and production) Act of 2008. The key regulators include the Minister for Mines, the Petroleum Committee, the Petroleum Technical Committee and the Hydrocarbon Unit. The main regulator is the Minister of Mines, Energy and Water Development, who is also the issuing authority of all petroleum rights under the Act. Despite wielding considerable power, the Minister cannot act without coordinated input from other regulators. For instance, the Minister of Mines, Energy and Water Development may not approve the grant or renewal of petroleum rights without first referring the matter to the Technical Committee for scrutiny. Similarly, the Technical Committee is tasked with making recommendations to the Petroleum Committee. Without the approval of the Petroleum Committee, the Minister may not act.

3.1.3. Fiscal Regime

The Zambian government obtains revenue from exploration companies operating in the gas and oil industry through taxation.

Taxation in Zambia is governed by the Income Tax Act, Customs and Excise Duty Act, the Property Transfer Tax Act and the Value Added Tax Act and other related legislation. Under the Income Tax Act, corporate tax on companies holding petroleum development and production licences is charged at 35% per annum. In addition, 15% withholding tax is charged on rentals, bank interest, dividends, management and consultancy fees.

Fees and rentals for the oil and gas sector are also collected and include:

- fees for inspection of the register;
- application fees for the petroleum exploration licence and its renewal;
- application fee for a development and production licence;
- annual licence fee (production);
- annual licence fee (exploration); and
- surface rentals.

⁷ Ministerial statement, Minister of Mines and minerals development on the status of petroleum exploration in Zambia, (<http://www.parliament.gov.zm>)

The Zambian petroleum regime is structured as a royalty/tax or 'concession' system rather than as a production sharing regime, with the rights and obligations of licensees governed principally by the terms and conditions of the license, and the legislation listed above.

3.1.4. Overview of Licensees in the Oil and Gas Sector

According to the Ministry of Mines Energy and Water Development (MMEWD), through the Geological Survey Department, to date 16 companies were awarded 25 Oil and Gas Exploration Blocks. These companies are presented in the table below and the blocks are shown in the ANNEX 6 of the present report.

Petroleum Companies	Blocks
Barotse Petroleum Company Ltd	20 - 21
Exile Resources Inc.	26
Metprosol / Frontier	34
Petrodell Resources Limited	17
MAJETU	13
Rapid African Energy Holdings	31
Terralinna (Z) Limited	24 - 38
Mafula Energy Limited	32
Gapex Resources Limited	7
ZCCM Investment Holdings PLC	1 - 4 - 6 - 10
Mineks Zambia International	27
Chat Milling	5
Rift Petroleum	40 - 41
Troisade Energy	8
SOGECO	39 - 43
BOWLEVEN Oil and Gas	25 - 28 - 29

3.2. Mining Sector

3.2.1. Mining sector overview

Zambia's mining sector is set to continue the recovery seen over the last decade. The country had declining copper output throughout the 1990s, but a mixture of privatisation and elevated copper prices has seen a substantial boost to investment and output. Zambia's mining sector has been highly amenable to foreign investment since the privatisation of state controlled Zambia Consolidated Copper Mines (ZCCM) at the end of the 1990s.

Copper and cobalt are the key minerals produced in Zambia. The mining industry also engages in the production of gold, emerald and lime. The Copperbelt and North-Western provinces have abundant copper and cobalt deposits and are the main focus of mining and development activity.

In 2011, Zambia was ranked the sixth largest copper ore producer in the world. Zambia is also a significant producer of semiprecious gemstones. With several expected expansion plans forthcoming, Zambia is viewed as a key growth area for copper production which is likely to rank the country within the top 5 copper producers globally going forward.⁸

The Government retains minority interest in most of the large copper projects through its holding company the Zambia Consolidated Copper Mines Investments Holdings Plc (ZCCM-IH). The mining sector is administered by the Ministry of Mines, Energy and Water Development. The Ministry of Commerce, Trade and Industry oversees the industrial manufacturing sector.

3.2.2. Main Exploration and Prospecting activities

(i) Copper and Cobalt Mining Prospects⁹

In 2012, First Quantum continued to work on the expansion of the Kansanshi in order to reach copper production capacity to 400,000 t/year by 2015. The increase in total copper output would include both copper cathode and copper in concentrate. First Quantum also continued exploration drilling programmes at Kansanshi and completed an infill drilling programmes at the Sentinel project (First Quantum Minerals Ltd., 2012a, p. 9).

Ore from development of the underground Lubambe Copper Mine (formerly the Konkola North Mine) was stockpiled until October 2012, when the mine's Concentrator was commissioned. In 2012, 3,214 metric tons (t) of copper in concentrate had been produced. Production is expected to reach 45,000 metric tons per year (t/yr) of copper in concentrate by mid-2015, when the plant is expected to be processing 2.5 million metric tons of ore per year with an average grade of 2.3% copper.

The joint venture of Seringa Mining Ltd and Katanga Resources Ltd., began with the construction of a small heap-leach facility at the Mkushi copper project. In 2012, copper ore was loaded on a small heap-leach pad at the Mkushi copper project and a sulfuric acid leach was started. (RTG Mining Inc., 2013, p. 2–3).

A number of cobalt and copper development and exploration projects in Zambia were ongoing. In 2012, Blackthorn Resources Ltd. of Australia completed a scoping study of the development of the Kitumba prospect as an open pit mine. Blackthorn also completed a drill programme of about 14,000 m at the Mumbwa project, which included 19 holes at the Kitumba prospect and 3 holes at the Kakozhi prospect (Blackthorn Resources Ltd., 2013a, p. 5; 2013b, p. 6).

Caledonia Mining Corporation of Canada completed a 20-hole 10,903-m diamond drill programme on the Nama cobalt and copper prospect in the Chililabombwe/Solwezi District. In 2012, Caledonia announced that it had reached an agreement with the Ministry of Mines, Energy and Water Development to start cobalt mining at Nama, to submit a feasibility study and programme of operations for copper production, and to submit an updated estimate of the Nama project's copper-sulphide mineral reserves and resources by 30 June 2013. Caledonia planned to mine and mill about 30,000 metric tons per month of ore initially, and to produce a cobalt oxide concentrate. Caledonia also agreed to begin copper production in early 2015 (Caledonia Mining Corp., 2013, p. 18–19).

(ii) Uranium Mining Prospects

In Zambia, uranium deposits are available in various geological environments. Uranium oxide (UO) production in Zambia has been limited to only 120,000 kilogrammes, from the Nkana mine from 1957–59. Since then, many companies have carried out explorations, focusing on potential mineralisation in Karoo Age sediments, the Copperbelt and the Domes region of the North Western Province¹⁰.

In 2010, African Energy Resources made a new uranium discovery at the Sitwe North prospect. This uranium prospect occurs within the Northern Luangwa Valley project of the company in Northern Zambia¹¹.

In 2011, Denison Mines Zambia Ltd., which is a subsidiary of Denison Mines Corp. of Canada, completed a 9,600-m drill program on the Dimbwe East prospect of the Mutanga project. Mutanga mineral resource estimates as of 12 September 2013 are about 41.4 Mlb U₃O₈ in measured, indicated and inferred¹².

(iii) Coal Mining Prospects

⁹ USGS, 2012 Minerals Year Book -Zambia

¹⁰ Metals in Zambia, Zambia Mining, accessed on 29 May 2012

¹¹ Zambian Uranium Projects, Energy Resources, accessed on 1 June 2012

¹² USGS, 2011 Minerals Year Book -Zambia

Sinazongwe coal project African Energy Resources Ltd. of Australia reported the occurrence of coal in water wells in the Kariba Valley. In January 2012, African Energy completed a 9-hole 1,691-m diamond drill programme to evaluate the coal occurrence (African Energy Resources Ltd., 2012, p. 6)¹³.

Re-commissioning of Maamba mine In 2009, Singapore's Nava Bharat Pte acquired a 65% share in Maamba Collieries — Zambia's largest coal producer. In 2011, Nava Bharat established a plan to start the construction of a 300MW coal-fired power plant in Zambia, to be completed by 2014. The investment for the first phase of the project — a new coal mine and the power plant — was projected to be around US\$750 million. The new mine is expected to produce 360,000 metric tons of coal in its first year of operation, and is expected to reach a maximum output capacity of 2 million metric tons of coal per year.

(iv) Gold Prospects

Luri Hill gold project, Luri Gold Ltd. of Australia completed a scoping study for the development of the Dunrobin prospect and started a scoping study for the development of the Matala prospect. Luri Gold also announced an initial measured resource estimate for the Dunrobin prospect of 978,000 mt of ore at a grade of 2.6 grams per metric ton (g/t) gold and indicated and inferred resources of 1.8 Mt of ore at a grade of 1.9 g/t gold (1 g/t cutoff grade) (Luri Gold Ltd., 2012a, b).

(i) Manganese Prospects

Manganese ore is produced primarily by small-scale operations near Mansa in Luapula Province and Mkushi in Central Province. Domestic subsidiaries of international companies that were involved in the small-scale manganese ore operations included Ore and Steel Feed Industries, Peniel Mines and Taurian Manganese Ltd.

Taurian started mining ore near Mansa in 2011 and proposed to build a 240,000-t/yr-capacity ferromanganese plant near Mansa in 2012 and to expand the plant's capacity to 720,000 t/yr by 2014. (Thomson Reuters, 2011)

Atticus Resources Ltd. of Australia initiated the acquisition of Zamanco Holdings Ltd. of Mauritius. Zamanco held two Zambian companies—Zamanco Minerals Ltd. (100% equity interest) and Zamanone Mining Ltd. (75% interest). The Zamanco Minerals Ltd. had proposed to develop the Serenje manganese project, which included an 180,000-t/yr-capacity manganese concentrate facility, three smelters with a total production capacity of 60,000 t/yr of high-carbon ferromanganese (with an expected average 78% manganese content), and a 12,000-t/yr-capacity aluminothermic smelter, which would produce manganese metal with a 95% manganese content (Atticus Resources Ltd., 2011, p. 6–13; Zamanco Minerals Ltd., 2012, slide 9)

3.2.3. Legal Framework

The Ministry of Mines, Energy and Water Development is responsible for enacting legislations for the mining sector in Zambia. The Mines and Minerals Act (1995) enacted by the Zambian government simplified licensing procedures significantly, placed minimum reasonable constraints on prospecting and mining activities and created a favourable investment environment. At the same time, the act allowed international arbitration to be written into development agreements, if deemed necessary.

In 2008, this act was replaced by the Mines and Minerals Development Act 2008, which ruled that no special agreements should be entered into by the government for the development of large-scale mining licenses and annulled the development agreements concluded under the previous Act.

Mining companies now operate under a common legislative framework regulated primarily by Act No. 7 of 2008 (the Mines and Mineral Development Act of 2008). Uranium exploration and mining

¹³ Correction From Source: Denison Files New Technical Report On Mutanga Uranium Project, September 2013

are regulated by the Mines and Minerals Development (Prospecting, Mining and Milling of Uranium Ores and Other Radioactive Mineral Ores) Regulations of 2008.

Investment in most types of mineral operations are covered by the Zambia Development Agency Act of 2006, although minerals produced for the construction industry, such as clay, sand, and most types of stone, are excluded. The government policy does not participate in exploration or other mining activities, or in any shareholding activity other than in a regulatory and promotional role. The right to explore or produce minerals is authorised by a license granted under the Mines and Minerals Act of 2008.

3.2.4. Mining Sector Contribution in the Economy

During 2012, the mining sector remained the country's major productive industry with very high contribution in exports and investment but lower contribution in Government revenues, GDP and employments as described below.

(i) Foreign Direct Investment (FDI)

Since the early 2000s, the mining sector has attracted investment in excess of USD 8 billion. It is projected that investments in the mining sector will reach approximately USD 15 billion on account of new projects under implementation and/or exploration by the year 2017 if the international metal prices hold above levels recorded in 2013¹⁴.

Zambia still has an exceptionally high level of macro-economic dependence on mining by international standards. Compared to other countries, mining makes an unusually large contribution to total national investment and to total foreign direct investment. In 2011, new FDI into mining accounted for 86.2 per cent of total FDI¹⁵.

The mining sector investments pledges over the past two years are detailed as follows:

	2011 (US \$ million)	2012 (US \$ million)
<i>Investment pledges from mining sector</i>	1,030.2	4,296.6
Total of Sectors	4,991.2	6,959.0
% contribution of mining sector to investment	20.6	61.7

(Source: Bank of Zambia, 2013, p. 36)

(ii) Exports

The mining sector accounts on average for almost 70% of exports earning over the period 2011-2012 with a large contribution of copper mining which accounts of over 96% of the sector exports as shown in the table below:

	2011 (US \$ million)	2012 (US \$ million)
Metal exports	6,915.7	6,497.6
<i>Copper exports</i>	6,659.7	6,294.5
<i>Cobalt exports</i>	256.0	203.1
Zambia Exports (f.o.b)	8,512.3	9,191.1
Contribution of mining sector	81.2%	70.7%

(Source: Bank of Zambia, 2013, p. 23; Balance of payments 2011-2012)

14 Zambia Development Agency, Zambia Mining Sector Profile, June 2013

15 ICCM/Chamber of Mines of Zambia ,Enhancing mining's contribution to the Zambian economy and society, April 2014

Over the period 2011-2012, metal export earnings declined by 6% to US \$ 6.5 billion from US \$7 billion registered in 2011, following a decline in both copper and cobalt export earnings. Copper export earnings, at US \$6.3 billion stood at 5.5% lower than US \$6 billion in 2011, driven by a decline in prices. The realised average copper price declined by 10.8% from US \$8,003.67 per tonne in 2011 to US\$ 7,135.84 per tonne in 2012. Copper prices were dampened on the international market on account of a slowdown in global demand driven by the effects of the euro debt crisis. (Bank of Zambia, 2012, p. 25).

(iii) Government Revenues¹⁶

In March 2014, the Zambia Revenue Authority provided updated data which included data for 2012. There has been a significant increase in both ratios (to total tax collections) and mining now contributes more than 30% to total government revenue.

Year	GDP	Total domestic revenues collected (K million) ¹⁷	Total taxes collected (K million)	Mining taxes collected (K million)	Mining Taxes % domestic revenues	Mining Taxes % Taxes collected
2012	111,222	22,372	20,719	6,901	30.8%	33.30%

(iv) Gross Domestic Product (GDP)¹⁸

In March 2014, the Zambian Central Statistical Office (CSO) completed their exercise to adjust the base year for GDP estimates to 2010 instead of 1994. As a result, the total GDP estimate increased by 25% and the contribution of mining sector to the country's GDP also increased.

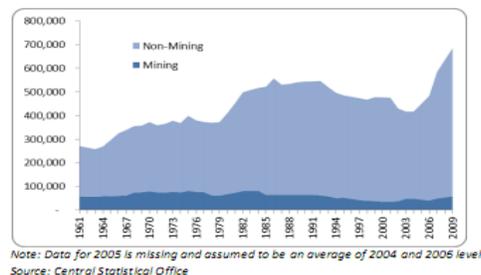

The old 2012 figures, the new 2012 figures based on the CSO update, are as follows:

Mining's contribution to GDP	2012(old)	2012(new)
Current prices	2.6%	11.2%
Constant prices	8%	12.3%
GDP (ZMW million)	111,222	111,222

Over the years 2010–15, the mining sector of Zambia is expected to grow by 7.5%, to US\$1.35 billion, according to ¹⁹ the Business Monitor International.

(v) Employment

The figure below shows that 22% of the formal Zambian workforce was employed by mining companies in 1964. However, by 2009 (the latest year for which data is available) this has dropped to 9%²⁰.

16 ICCM/Chamber of Mines of Zambia ,Enhancing mining's contribution to the Zambian economy and society, April 2014 (updated data)

17 Bank of Zambia Report, 2013, p. 27

18 ICCM/Chamber of Mines of Zambia ,Enhancing mining's contribution to the Zambian economy and society, April 2014 (updated data)

19 Zambia Mining Report Q1 2012, Research and Markets, January 2012

20 ZIPAR, A Guide to mining taxation in Zambia, June 2013

This trend reflects both the expansion of employment in other sectors and fundamental changes within the mining industry. Whereas mining was traditionally a relatively labour intensive industry, modern mining is capital intensive.

The preliminary results of the national Labour Force Survey for 2012 (Central Statistical Office, May 2013) show a total formal employment in mining in 2012 of over 90,000, of which 82.5% employed in formal sector. This represents about 1.7% of the labour force, 8.3% of total formal sector jobs and around 25% of total private sector formal jobs in 2012.

(i) Foreign Exchange Earnings

In 2012, mining companies were the main suppliers of foreign currency with a placement of US \$2,736.9 million, representing 42.8% of the total market funding (Bank of Zambia, 2012, p. 21)

3.2.5. Fiscal Regime

Since the privatisation of Zambia's mining sector, four Tax regimes have been adopted:

Tax regimes	Key contributions
The Development Agreements (DA) negotiated with individual mines during privatisation (1997 to March 2008)	Agreements were made between the Zambian government and each company that bought the assets of the former national company ZCCM. Each Development Agreement contained a fiscal stability clause.
The "2008 regime" (April 2008 to March 2009)	The 2008 reforms ruled that no special agreements should be entered into by the government for the development of large-scale mining licenses and annulled the development agreements concluded. A new tax regime with a higher tax burden was introduced by this reform.
The "2009 regime" (April 2009 to March 2012)	In response to the mining companies concerns about the revocation of the Development Agreements, some of the 2008 tax measures were reversed in the 2009 Budget. Details are shown in the table below.
The "2012 regime" (since April 2012)	Further reforms were made to the mining tax regime in the 2012 Budget. The two main changes for the mining industry were the increase of the mineral royalty rates for copper and cobalt and hedging and operating income were again to be treated separately for income tax purposes.

The table below contains the tax rates relevant to mining companies and provides a brief on the changes introduced in each tax regime:

Tax Rates Relevant to Mining Companies of the Four post-Privatisation tax regimes

	DA	2008	2009	2012-2013
I. Profit tax types				
Corporate tax rate (% of the profit base)	25%	30%	30%	30%
Variable Profit Tax in effect?	No	Yes (if taxable profits / sale revenue > 8%)	Yes (if taxable profits / sale revenue > 8%)	Yes (if taxable profits / sale revenue > 8%)
Hedging activity considered part of the mining business (rate)	Yes	No (30%)	Yes	No (35%)
Profit tax base details				
Capital Depreciation Allowance (% of annual capital expenditure)	100%	25%	100%	25% (*)
Loss carry forward (maximum years)	15 to 20 years (depending on company)	10 years	10 years	10 years
Allowable Debt to Equity ratio	2:1	3:1	2:1	2:1
II. Revenues Based Tax				
Mineral Royalty (Base metals)	0.6%	3%	3%	6%

	DA	2008	2009	2012-2013
Mineral Royalty (Precious metals)	NA	5%	5%	6%
Mineral Royalty (Gemstones)	NA	5%	5%	6%
Windfall Tax	No	Yes	No	No

III. Other Tax types

Customs duty	Exempt in most cases	Rebate	Rebate	Rebate
Export duty on copper and cobalt concentrates	No	15% (but with some waivers)	15% (but with some waivers)	10% (but with some waivers)
Export duty on all other unprocessed or semi-processed mineral ores	NA	No	No	10%
Withholding profit tax	0%	15% on services, fees and interests	15% on services, fees and interests	15% on services, fees and interests
VAT deferment scheme	No	Yes	Yes	Yes

NA: Not available
Applicable from 01 January 2013

3.2.6. Mining Rights Allocation

(i) Mining Rights process

There is a strict requirement that a person shall not prospect for minerals or carry on mining operations or mineral processing operations without the authority of a mining right or mineral processing licence granted under the Mines Act, 2008.

The Director of Mines Development Department (MDD) is responsible for granting mineral rights. The act set up two cadastre offices – one at the central level (to process applications for mining rights) and one at the provincial level (to forward applications to the central office).

Normally prospecting licences for mineral resources are granted by the Geological Survey Department, but auctioning may be undertaken in areas where known mineral resources exist. In the latter case the following procedure is followed:

Stages ²¹	Procedure
1. Bids Invitation Notice	The notice is issued by the Minister of Mines and includes : <ul style="list-style-type: none"> - a description of the areas in which the bids are to be solicited - the procedures and rules relating to the submission of the bids; and - the period within which the bids shall be submitted
2. Notice publication	The notice is published in a newspaper of general circulation in Zambia
3. Bids submission for evaluation	The bids are submitted by the Minister of Mines to the Mining Advisory Committee for evaluation within 5 days of the bid submission deadline
4. Bids Evaluation	The evaluation is performed by the Mining Advisory Committee shall the following criteria: <ul style="list-style-type: none"> - the investment and financial flows; - the environmental management plan; - in the case of a holder of a mining right, whether the holder has been compliant with regulations and provisions of the Act; and - any other matter relevant for the purpose of the Mines Act. <p>The Mining Advisory Committee evaluates the bids in accordance with stipulated requirements and advises the Minister on the successful bid.</p>
5. Granting of Licences	The licence is granted by the Minister of Mines to the holder with the best proposed programme, taking into account the recommendations of the Mining Advisory Committee.

According to the data collected during the scoping study, there were no bid processes launched during 2012.

²¹ Mines Act, 2008; (12) Bids

Types of Licenses

A number of mining rights can be granted under the Mines Act in Zambia.

- ❖ Three types of licences are available to the large-scale operators (*ownership is not restricted to international companies – they can be held by companies registered in Zambia and individuals*):
 - Large Scale Prospecting Licence: this confers the right to prospect for any mineral over any size of area for a period of two years and is renewable up to a maximum of 7 years;
 - Large Scale Mining Licence: this confers exclusive rights to carry out mining operations and other acts incidental thereto in the area for a maximum of 25 years. An approved environmental Impact Assessment is required to support the application; and
 - Large Scale Gemstone Licence: this confers exclusive rights to carry out prospecting and mining operations and other acts incidental thereto in the area for a maximum of 10 years. An approved environmental Impact Assessment is required to support the application.
- ❖ Similar rights are available to smaller operators, but on a reduced scale (*restricted to citizens or citizen owned companies*).
 - prospecting permit: (300 cadastre units=10km²); Valid for 5 years, non-renewable.
 - small-scale mining licence: (120 cadastre units=4km²); Valid for 10 years, renewable.
 - small-scale gemstone licence: (120 cadastre units=4km²); Valid for 10 years, renewable.
- ❖ Artisanal mining right (*not restricted to mining on a community basis or locals*) may be (and often are) owned by individuals (citizens) with no link to the community. Artisan's mining right (2 cadastre units=0.0668km²); Valid for 2 years, renewable.

According to MMEWD data, there were 1,739 active mining Rights in 2012 and 1,468 in 2011 totalling 1,140 and 991 operating entities (companies and individuals) respectively. The types of rights are set out in the table below:

Type	Description	2011(*)		2012	
		Active Licences	Number of Holders	Active Licences	Number of Holders
AMR	Artisan Mining Right	44	37	72	60
LGL	Large Scale Gemstone Licences	-	-	6	4
LML	Large Scale Mining Licences	65	37	77	43
LPL	Large Scale Prospecting Licences	550	283	735	392
SGL	Small Scale Gemstone Licences	182	168	132	126
SML	Small Scale Mining Licences	358	262	379	267
SPP	Small Scale Prospecting Permits	269	204	338	248
Total		1,468	991	1,739	1,140

(*) 2011 ZEITI Report

The licensee register summarising all licenses granted is not publicly available. These licenses are detailed in Annex 7 of this report.

3.3. Collection and Distribution of the Extractive Revenues

3.3.1. Budget Process

The Zambian budget process has five main stages involving drafting, legislating, execution, auditing and publishing.

(i) Drafting

This is the first phase in the budget process. In the Medium Term Expenditure Framework (MTEF) arrangement, the government is required to engage in consultations with various stakeholders.

(ii) Legislating

Budgets are allocated taking into account the relevant acts in the constitution. Budgetary allocations are defined in Article 117 (1) of the Constitution of Zambia. At this stage, the final result still lies heavily with the legislature.

(iii) Execution

At this stage, Parliament concerns itself with the effectiveness and efficiency with which funds are utilised, Members of Parliament look out for issues of service delivery, overspending, misuse and misapplication in areas other than those authorised or planned for.

(iv) Auditing

The budgeting system in Zambia is audited by the office of the Auditor General which verifies whether funds have been spent on the authorised items; and ensures there are no any under or over spending, misappropriation, theft, and assess whether resources have been utilised efficiently. The Report of The Auditor General on the accounts of the Republic for the financial year ended 31 December 2012 is available on the OAG website²². The 2013 exercise is still ongoing. The Auditor General follows the standards issued by the International Organization of Supreme Audit Institutions (INTOSAI).

Post-budget period audits are the responsibility of the Public Accounts Committee (PAC). PAC examines historical records for disbursements and budget performance. A substantial part of the supplementary expenditure is often incurred on items and areas other than those which were originally envisaged. PAC has a specific mandate under the standing orders of Parliament and as such cannot initiate an investigation into any matter of public interest. The PAC only makes recommendations to the Executive which is also expected to enforce them.

(v) Publishing

Part X of Article 118 of the Republican Constitution requires that the National Treasury prepares and tables the State's consolidated Annual Financial Report, which includes information on revenues and other funds received and spent by the Government during the financial year. Besides being mandated by legislation, the Annual Financial Report is meant to provide a summary on National Government financial resources and their application for the benefit of the people of Zambia and other interest groups. The 2012 Annual Financial Report is available on the MoF website²³.

²² <http://www.ago.gov.zm>

²³ <http://www.mofnp.gov.zm>

3.3.2. Revenues Collection

(i) Revenues Recorded in National Budget

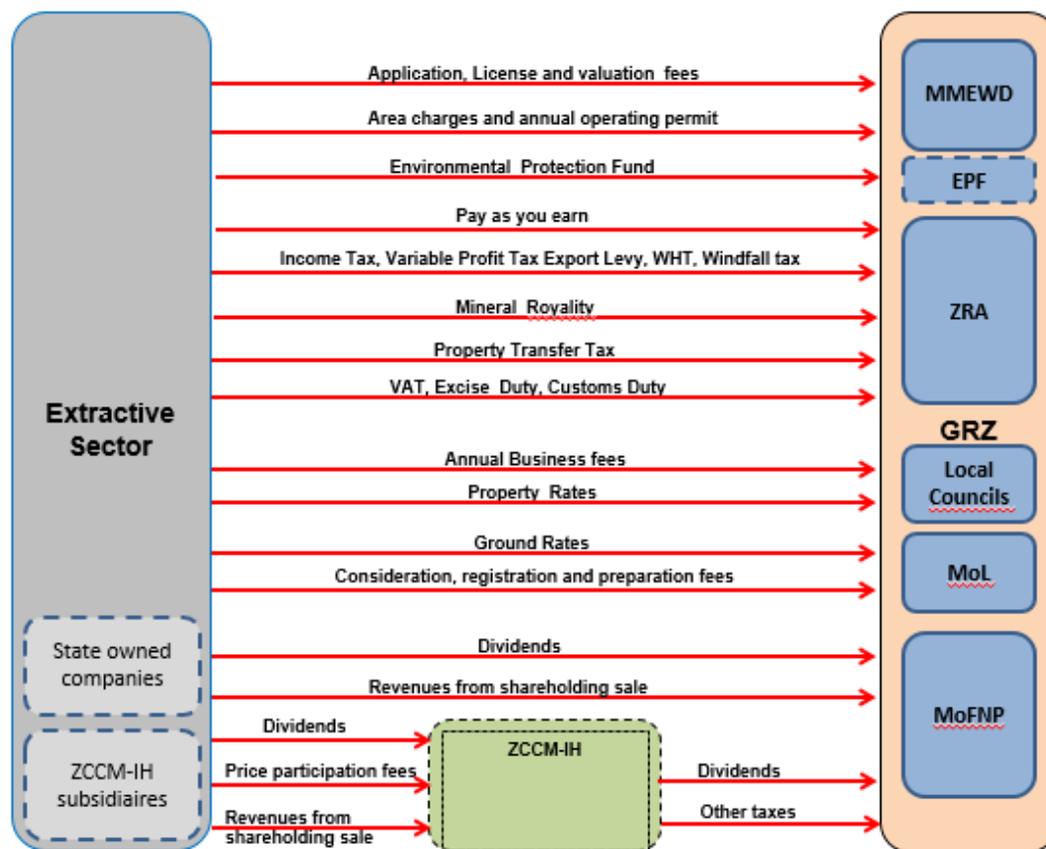

Once minerals are commercialised, the revenues due to the State have to be collected through the revenue collection framework. Under the current regime, all payments are made in cash.

Payments are made by the companies to various Government Entities. ZRA receives most of the funds from mining companies. ZRA has two operating divisions: The Customs Services Division and the Domestic Taxes Division; with both collecting over 98% of all Zambia’s taxes from the mining sector.

The other payments from the mining sector are made to local councils, where mining companies are based, to MoL and to the Ministry of Mines and Mineral Development.

The Ministry of Finance is also part of the revenues collection framework through investments held in some Zambian mining companies (see section 4.2.4).

The mining revenue collections framework can be represented diagrammatically as follows:

(ii) Environmental Protection Fund (EPF)

The Government enacted the Mines and Minerals Development Act 2008, which stipulates that an Environmental Protection Fund should be set up. This legislation provides for contributions to EPF by mine operators in form of cash as well as lodgement of other forms of security.

The EPF has been established with the appointment of EPF committee members by the Minister of Mines.

The objectives of the EPF are to:

- provide assurance to the Director of the Mines Safety Department that the developer shall execute environmental and social impact statements in accordance with the Mines and Minerals (Environmental) Regulations, 1997; and
- provide protection to the Government against the risk of having the obligation to undertake the rehabilitation of mining areas where the mining licence holder fails to do so.

The EPF is supervised by the Minister of Mines, Energy and Water Development through Statutory Instruments, (SIs) in particular SI No. 102 of 1998. EPF operates under the following fundamental guidelines:

- cash payment into EPF to be in hard currency;
- the developers contributions to the EPF shall be made in the form of a hard currency (Cap. 213, S.76 (2) (b) and S.I 102 of 1998 (Regulation 8 (2)).
- the balance on deposits lodged under S.1. 29 of 1997, Regulation 66 (1), (2) and (3) shall be secured with the Fund by the developer by way of lodgement of a Bond or Bank Guarantee to be determined by the Minister (Cap. 213, S. 76 (1) (b));
- funds to be Index-Linked, no interest earned;
- the developer's contribution shall retain its time-value with respect to inflation as calculated relative to hard currency (S.I. 102 of 1998 Regulation (8) (3)). At the expiry of a licence or permit, the developer shall be refunded the amount deposited to the extent that such amounts were not appropriated by government for payment of any progressive rehabilitation costs (Cap. 213, S. 82 (3) (a) and (b)). The refund shall not accumulate interest ; and
- only the Fund Committee can approve withdrawals from EPF.

In the event that a developer is directed by the Director of MSD to take specific remedial action, and fails to do so, the Director shall execute the remedial action using the developer's contributions to the Fund which becomes recoverable (Cap 213, S/78 (1)). The developer's fund so used shall not exceed the amount of cash deposit lodged by him to the Fund (Cap 213, S. 82 (3) (b)). This therefore means that each developer can use only his contribution and will only get his contribution back.

Administrative expenses of operating the fund shall not exceed 1% of the total income of the Fund except during the commissioning of the office of EPF Manager (S.I. 29, 1997 Regulation (5)).

Payments are made to the Fund in US\$, and are retained in a US\$ bank account. The Fund is audited annually by an auditor appointed by the Committee.

(iii) ZCCM-IH

ZCCM-IH is also part of the revenues collection framework through investments holds in Zambian mining companies (detailed in section 4.2.5).

As a State owned company, ZCCM-IH pays taxes to various Government Entities in accordance with prevalent laws and also pays dividends to the government as a shareholder. In addition, ZCCM-IH is entitled to dividends from the private companies in which it holds shares as well as price participation fees from companies, under arrangements dating back to the privatisation of the industry.

The Company publishes annual financial statements which are certified by a statutory auditor. ZCCM-IH annual reports and 2012 certified financial statements are available on the company website²⁴.

²⁴ <http://www.zccm-ih.com.zm/>.

3.3.3. Mining Revenues Management

The effective PFM and expenditure management are critical to transforming revenue from natural resources into broad-based sustainable economic and social development. The areas of spending that have broader external benefits for the economy as a whole include infrastructure and education.

However, as stated under Part III (13) of the Public Finance Act of 2004 of the Republic of Zambia, "There shall be established a Consolidated Fund into which all general revenues and other public moneys accruing to the Treasury shall be credited. The amounts payable to the Consolidated Fund under subsection (1) shall be deposited into the Treasury Account which shall be maintained at the Bank of Zambia."

The contributions by mining companies therefore lose their identity once they are deposited into the consolidated fund. Their use cannot therefore be tracked to public investment/expenditure or to expenditure units/cost center or projects.

3.3.4. Mining Revenues Transfers to Sub National Level

The Government's 2002 National Decentralisation Policy (officially launched in 2004) sets out greater responsibilities for local government in delivery of public goods and services. However, in practice, the delivery of public goods and services in Zambia remains highly centralised. The budget does not show expenditure by urban or rural areas, but rather by line ministry, which means it is difficult to track where money is actually spent.

During 2010, the Zambian Government introduced a formula-based grant system, with the dual aim of making local government funding more predictable and transparent, and allowing government to better track the usage of grants by councils. Data was not available to assess whether this reform initiative has operated as intended.

However, there are specific contributions by mining companies which are meant to be applied to certain counties or institutions for social development. In accordance with Section 136 of the Mines and Minerals Development Act 2008, the Minister of Finance shall, in consultation with the Minister responsible for Mines, establish a mineral royalty sharing mechanism for distributing royalty revenues. However, there is no provision within the legislation as to what this mechanism should be, thus leaving a legal vacuum in the modalities of the handover and percentage that should be transferred by the central government. Therefore, mineral royalties' transfers have yet to be formalised and remain ineffective.

3.4. Beneficial ownership

Zambia requires companies to disclose beneficial ownership information, and government officials must report their financial interests in the sectors they oversee.

The government regularly publishes the level of beneficial ownership in companies operating within the country including mining companies. The information is disclosed in the GRZ Financial Report published annually. The investment portfolio for Government in companies operating in the mining sector for 2012 is detailed in section 3.5.2 of this report.

The same applies for ZCCM-IH, which publishes all the equity stakes in mining companies in its annual audited financial reports publicly available on the company website. The level of beneficial ownership in companies operating in mining sector for 2012 is detailed in section 3.5.1 of this report.

Information on beneficial ownership are also required from mining companies in the followings cases:

- Transfer of control of company: the consent of the Minister of Mines should be obtained before the transfer and the Minister may call for and obtain information in the new owners;

- The company is listed: ownership information must be included in the annual report as a note to the accounts. Companies must disclose ownership by any shareholder (other than a director) who directly or indirectly owns 5% or more of any class of shares.

According to the Mines and Minerals Development Act 2008, a person is deemed to have control of a company, if the person holds a total of 50% or more of the equity shares of the company or if the person is entitled to appoint, or to prevent the appointment of, half, or more than half, of the number of Directors of the company.

According to the requirement 3.11 of the EITI Standard, the mining companies selected in the reconciliation scope, unless it is publicly listed or is a wholly owned subsidiary, were required to disclose information about their beneficial owners. The data collected is detailed in annex 3 of this report.

3.5. State Participation in the Extractive Sector

3.5.1. ZCCM-IH

The ownership of mines has undergone a sequence of radical changes. Initially a private industry under the colonial administration, the mining industry was nationalised in the early 1970s, with the creation of the state-owned Zambia Consolidated Copper Mines (ZCCM). Following a combination of low prices and lack of capital to invest resulted in production of copper falling, ZCCM's operations became increasingly unprofitable and the industry was re-privatised in the late 1990s.

Although the mines are now operated by private companies, the Government retains minority interests in most of the large copper projects through its holding company Zambia Consolidated Copper Mines Investments Holdings Plc (ZCCM-IH).

ZCCM Investments Holdings Plc (ZCCM-IH) is quoted on the Lusaka, London, and Euronext Stock Exchanges. The Company's shareholders include the Government of Zambia with 87.6% shareholding while private investors cumulate shareholdings of 12.4%.

The Company has close links with two Government ministries namely, Ministry of Mines, Energy and Water Development and Ministry of Finance. Both ministries have representation on the Board of ZCCM-IH. The Company also maintains a close relationship with Government through representatives of some autonomous agencies on the Board of ZCCM-IH namely the Zambia Revenue Authority and the Bank of Zambia (central bank).

Through its shareholding in mining associate companies, ZCCM-IH serves as an entity holding the government's minority interests in the privatised mining companies.

The investment portfolio for ZCCM-IH comprises primarily investments in Zambian mining companies detailed as follows:

Mining company	Shares held on 31 March 2011 (*)	Shares held on 31 March 2012
Ndola Lime Limited	100	100
Kariba Minerals Limited (a)	-	50
Maamba Collieries Ltd	100	35
Konkola Copper Mines Plc	20.6	20.6
Kansanshi Mining Plc	20	20
CNMC Luanshya Copper Mines Plc	15	20
Lubambe Copper Mine Ltd (formerly Konnoco) (b)	-	20
NFC Africa Mining Plc	15	15
Chibuluma Mines Plc	15	15
Chambishi Metals Plc	10	10

Equinox Minerals (c)	2.97 (sold in 2011)	-
Albidon Zambia Ltd	0.98	-

(*)Source: 2011ZCCM-IH Annual report

(**)ZCCM-IH Reporting Template (2012)

- (a) In 2012, the 50% shareholding held by the Government of the Republic of Zambia (GRZ) in Kariba Minerals Limited (KML) was sold to ZCCM-IH. The agreement was cleared by the Attorney General's office.
- (b) On 16 November 2011, ZCCM-IH exercised its option and took up 20% shareholding in Lubambe Copper Mine Limited, of which 5% was free carried while the additional 15% required cash contribution from ZCCM-IH in order to further the development of the mine in line with the provisions of the Konnoco Agreement of 1997. Transaction agreements were signed by ZCCMIH, VALE/ARM and Konnoco Zambia Limited representatives on 15 September 2011.
- (c) ZCCM-IH disposed of its 2.97% interest in Equinox Minerals Limited (Lumwana Copper Project) and realised a gain of ZMW 273 million (proceeds of ZMW802 million (US\$ 167.5 million) less carrying amount of ZMW 529 million).

ZCCM-IH also contributes to the direct financing of mining projects. According the company's financial reports, funding were granted to its subsidiaries operating in the mining sector; and the terms of the transactions can be summarised as follows:

Beneficiary	Terms of the transaction
1. Ndola Lime Company Limited	<p>In 2011, Ndola Lime Company Limited received ZMW 137 million (US\$ 26 million) as a shareholder loan from ZCCM Investments Holdings Plc to refinance the bridging facility from Standard Bank of South Africa for the recapitalisation project. The loan attracted interest at 5% per annum and is repayable in 60 equal instalments which commenced on 30 September 2013. The loan is not secured.</p> <p>On 18 October 2012, ZCCM-IH and Ndola Lime signed a Loan agreement under which ZCCM –IH agreed to provide a 7-year Shareholders Loan of ZMW 132.6 million at an interest rate of 14% per annum. The loan was used to finance the recapitalisation project at Ndola Lime intended to increase productive capacity to meet increased demand. At 31 December 2012 the entire loan amount had been disbursed.</p>
2. Kariba Minerals Limited.	<p>On 10 December 2012, ZCCM-IH and Kariba Minerals Limited entered into an intercompany loan agreement for a cash advance of US\$1.25 million (ZMW 6.6 million). Repayment will commence at the end of the 12 months from the date of disbursement and will be paid annually. The loan attracts an interest rate of 6 % per annum.</p>
3. Lubambe Copper Mines Limited	<p>On 15 September 2011, ZCCM – IH entered into an intercompany loan agreement with Lubambe Copper Mines Limited, for a cash call loan amount of US\$60 million. The loan is not repayable until the mine's commercial production commences. The outstanding principal is repayable after the expiry of the availability period in 12 equal quarterly instalments. The loan attracts an interest rate of LIBOR plus 5% and is not secured.</p>
4. Nkandabwe Coal Mines	<p>During 2012, ZCCM – IH advanced a loan to Nkandabwe Coal Mine of ZMW 158,000. There are no repayment terms and that loan is interest free and is not secured.</p>

(Source: 2011- 2012-2013 ZCCM-IH Annual reports)

ZCCM-IH is also a holder of prospecting licenses detailed as follows:

Code	Resources	Grant Date	Expiry Date	Map Reference
13855-HQ-LPL	Au, Cu, DIA	22/06/2010	21/06/2012	Northern, Chinsali
13856-HQ-LPL	Ag, Au, Cu, Mn	22/06/2010	21/06/2014	Northern, Chinsali, Mpika

PEL015-Block 10	Oil and Gas	23/06/2011	22.06.2015	Western Province

3.5.2. State Participation in Mining Companies

The Government of Zambia is the major shareholder of ZCCM-IH and therefore the Company has strong links with the government. Through its shareholding in mining associate companies, ZCCM-IH serves as an entity holding the government's minority interests in the privatised mining companies and other new investors in the mining industry.

According to GRZ Financial Report for the year ended 31 December 2012, the investment portfolio for Government comprised investments in companies operating in the mining sector in addition to ZCCM-IH. These participations are held through MoF and are detailed as follows:

Entity	2011	2012
ZCCM-IH	87.6	87.6
Kagem Mining Company	20	20
Kariba Minerals Limited	50	50

The government's involvement in the mining sector includes also financing ZCCM-IH investment activities. The funds granted by GRZ to ZCCM-IH can be summarised as follow

Beneficiary	Terms of the Transaction
GRZ Loan	This relates to loans advanced to the Company by the Government of the Republic of Zambia (GRZ) and the liability carries no definite repayment terms. The loan is interest free, unsecured and has no repayment terms and conditions. Therefore, it is payable on demand. The outstanding balance 31 March 2013 was ZMW 658 million.
GRZ/Kariba Minerals Loan	In 2012, GRZ's 50% shareholding in Kariba Minerals Limited (KML) was sold to ZCCM-IH through a loan granted to the latter for an amount of ZMW 14.8 million.
Chambishi Metals Plc	In May 2005, the Board of Directors of Chambishi Metals Plc resolved to undertake a rights issue of 25,000,000 new shares at par value of US\$1 per share. ZCCM-IH was offered 2,500,000 ordinary shares at a par value of US\$1 representing 10% of the shareholding of the new shares to be issued. The ZCCM-IH subscription was converted into a deferred loan for 10 years to be serviced by dividend payments when due from Chambishi Metals Plc and Luanshya Copper Mines Plc. The loan carries interest at LIBOR + 3%.
GRZ/World Bank loans	Under the protocol signed on 14 January 1999, between GRZ and the Company, an amount of up to US\$68.5 million became available to the Company for the purpose of retrenching surplus employees and meeting environmental remedial obligations. This amount was initially received by GRZ from IDA and subsequently lent to the Company. No interest has been accrued in respect of these balances. The loan is unsecured and has no repayment terms and conditions and is therefore it is payable on demand.

(Source: 2011- 2012 ZCCM-IH Annual reports)

It should be noted that no payment flows related to barter arrangements involving infrastructure works have been identified nor confirmed by MoF.

3.6. Audit and Assurance Practices in Zambia

3.6.1. Extractive companies

The Companies Act requires every company to appoint qualified auditors within 3 months after incorporation and yearly at their annual general meeting. Annual financial statements of extractive companies are not systematically available to the public except for listed companies.

The Securities Act and the Lusaka Stock Exchange listing requirements demands that auditors of listed companies to be practicing members of ZICA and to apply standards set by ZICA. These requirements ensure that only auditors who are ISA compliant can audit these public interest entities.

The Public Finance Act (2004) gives the Auditor General the responsibility of auditing state-owned enterprises. Section 44 (1) states, "It shall be the duty of the Auditor General to audit, in accordance with the provisions of the Public Audit Act the accounts of any statutory corporation." The Auditor General follows the standards issued by the International Organisation of Supreme Audit Institutions (INTOSAI).

The Zambia Revenue Authority does not require companies to have audited accounts for tax purposes. However, it is widely acknowledged that an environment of high-quality financial reporting would also improve efficiency in tax assessment.

3.6.2. Government Entities

Audit practices for the budgeting system in Zambia are described above in paragraph 3.3.1 (iv) of this report.

4. DETERMINATION OF THE RECONCILIATION SCOPE

Our work included a general understanding of the extractive sector in Zambia. We also consulted with Government Entities in order to collect relevant information on the size of the extractive sector in Zambia and its contribution to the economy and to government revenues, as a part of the process to establish the prospective scope of the 2012 reconciliation.

We have taken into account all the available information presented to us during our fieldwork including the subsequent comments and information of the Zambia EITI Council.

4.1. Selection of payment flows

During the scoping study, we consulted Government Entities which received flows from the extractive sector.

4.1.1. Ministry of Mines, Energy and Water Development

According to the Cadastre Department there are 11 categories of fees and charges payable by mining companies to MMEWD. These fees and charges are set out in the table below:

No.	Category
1	Application Fees (New and Renewals)
2	Licence Fees (New and Renewals)
3	Area Charges
4	Licence Fees
5	Alteration - Application Fee
6	Alteration - Licence Fee
7	Transfer Application Fee
8	Transfer Licence Fees
9	Search and Other Fees
10	Environmental Protection Fund
11	Annual Operating Permits

According to the table above we can regroup the fees and charges payable to MMEWD in six (6) categories:

No.	Category
1	Area Charges
2	Application Fees
3	Licence Fees
4	Valuation fees
5	Payments made to the Environmental Protection Fund
6	Annual Operating Permits.

We propose to maintain the same payment flows selected for the 2011 reconciliation exercises.

4.1.2. Zambia Revenue Authority

The table below is a summary of the taxes paid by the mining companies to the Large Taxpayers office and the Customs Office of ZRA during 2012:

Category	Amount (ZMW million)	Cumulative (ZMW million)	Cumulative in %
Company Tax	2,731.759	2,731.759	37%
Mineral Royalty Tax	1,416.286	4,148.045	56%
Value Added Tax (On Imports)	1,308.209	5,456.254	74%
Pay as You Earn	1,117.402	6,573.657	89%
Value Added Tax	355.775	6,929.431	94%
Customs Duty	314.808	7,244.239	98%
Withholding Tax	124.100	7,368.339	100%
Excise Duty on Imports	21.127	7,389.466	100%
Property Tax	6.065	7,395.531	100%
Asycuda Processing Fee	4.092	7,399.623	100%
Export Duty	1.521	7,401.144	100%
Motor Vehicle Fee	0.114	7,401.258	100%
Carbon Emission Surtax	0.067	7,401.325	100%
Advance Income Tax	0.055	7,401.380	100%
Medical Levy	0.048	7,401.428	100%
Examination Fee	0.017	7,401.446	100%
Fuel Levy	0.006	7,401.451	100%
Total	7,401.451		

Given the significant amount of taxes paid to ZRA, our selection of material payments and companies was based on the amount of revenue collected by ZRA. We also make the following recommendations:

- (i) we propose to maintain the list of payment flows selected for the 2011 reconciliation;
- (ii) Asycuda processing fees and Examination fees are paid to ZRA for registering goods imported into Zambia. This payment does not fall under the tax category but is rather a fee for public services provided (in the same manner as electricity, water, telephone, etc.); and
- (iii) Motor Vehicle Fees, Carbon Emission Surtax, Advance Income Tax, Medical Levy and Fuel Levy do not present material flows with less than 0.03% of the total payments to ZRA and have therefore been excluded.

4.1.3. Ministry of Local Government and Housing (Sub National Payments)

The contribution to the Ministry of Local Government and Housing (MOLGH), and specifically the Local Councils, will be restricted to two fees as per the 2011 reconciliation exercise:

- Property rates; and
- Annual Business Fees.

The selection of these fees was not based on an assessment of information collected in respect of 2012. They were included on the basis of information set out in the 2011 reconciliation report.

These payments are financially immaterial in the context of Zambia, but we propose to include them because they are important to the areas served by local councils.

4.1.4. Ministry of Lands

Four types of fees are payable to the Ministry of Lands by mining companies:

No.	Category
1	Ground Rent
2	Consideration Fees
3	Registration Fees
4	Preparation Fees

We propose to include all of the above 4 types of fees in order to ensure completeness of income.

4.1.5. Ministry of Finance

We recommend including the dividends received from State owned companies in the 2012 reconciliation exercise as well as the revenues received from the sale of GRZ shareholding in these companies.

We wish to highlight that no payment flows related to barter arrangements involving infrastructure works as set out in EITI Requirement 4.1.d have been identified nor confirmed by MoF.

4.1.6. ZCCM-IH

As per the 2011 reconciliation, we propose that the 2012 reconciliation exercise should include the following revenues streams:

No.	Category
1	Dividends from ZCCM-IH Shares
2	Price participation fees
3	Revenues from ZCCM-IH shareholding sale
4	Revenues from ZCCM-IH mining rights transfer

4.1.7. Social payments

These consist of all contributions made by extractive companies to promote local development and to finance social projects in line with the EITI Standard. Requirement 4.1.e encourages multi stakeholder groups to apply a high standard of transparency to social payments and transfers, the parties involved in the transactions and the materiality of these payments and transfers to other benefit streams, including the recognition that these payments may be reported even though it is not possible to reconcile them.

These contributions can be made in cash or in kind. This category includes, inter alia: health infrastructure, school infrastructure, road infrastructure, market gardening infrastructure, projects related to the promotion of the agriculture and the grants provided to the population.

The social payments were included in the 2012 EITI scope through a unilateral disclosure of mining companies. These payments can be summarised as follows:

No.	Category
1	Corporate Social Responsibility In kind payments
2	Corporate Social Responsibility cash payments

4.1.8. Sub National Transfer

In accordance with Section 136 of the Mines and Minerals Development Act 2008, the Minister of Finance shall, in consultation with the Minister responsible for Mines, establish a mineral royalty sharing mechanism for distributing royalty revenues.

However, we note that there is no provision within the legislation as to what this mechanism should be, thus leaving a legal vacuum on the modalities of the handover and the percentage that should be transferred by the central government.

As a result, sub national transfers are not yet formalised and are not currently effective. It should be noted that no transfer were reported by central government for 2012.

4.2. Selection of Extractive Companies

4.2.1. Oil and Gas Companies

According to the information made available by MMEWD, there were no activities carried out by extractive companies during 2012 in the Oil and Gas sector. GRZ has recently started prospecting for Oil and Gas.

The Geological Survey Department (GSD) of MMEWD has confirmed that sixteen (16) petroleum exploration licenses have been issued to date. GSD has also confirmed that there were no contracts signed between the Government and oil and gas companies and there were no oil and gas signature bonuses paid in 2012.

According to data received from MMEWD, total licence fees and area charges paid by Barotse Petroleum Company and Mafula Energy Ltd amount to ZMW 0.73 million. These payments are less than **ZMW 1 million** and were considered to be non material in the context of the 2012 reconciliation exercise.

As a result, we propose to include the Oil & Gas Sector in the 2012 EITI report via the unilateral disclosure by Government Entities of the combined benefit stream from Oil and Gas operator listed in Annex 4.

Currently, oil and gas companies are still in the exploration phase. Therefore, to date no contract has been signed.

4.2.2. Mining Companies

The information provided to us during the scoping study and related to the 2012 tax collection was limited to the payments received by ZRA from the mining sector. Nevertheless we set out in the table below the tax collection per Government Agency based on the 2010 and 2011 EITI reconciliation exercises:

Government Agency	Amount 2010 (ZMW million)	%	Amount 2011 (ZMW million)	%
ZRA	3,725.547	98.42%	7,452.685	98.92%
MMEWD	15.665	0.41%	30.553	0.41%
MoL	0.021	0.00%	2.475	0.07%
MoLGH	44.086	1.16%	48.205	0.64%
Total revenues	3,785.319		7,533.918	

From the above table, we can conclude that ZRA is the main recipient of payments from the mining sector. As a result, the materiality has been based on payments made by mining companies to the Large Taxpayers office and the Customs Office of ZRA.

The Large Taxpayers Office provided information on receipts during 2012 from the mining sector which amounted to ZMW 7,402 million from 113 companies including those not operating in the mining sector.

For each company where ZRA reported receipts in 2012, we reviewed the licensing information provided by the Mining Cadastre and identified companies which held active licenses or made royalty payments, categorising them as “mining companies” or “non-mining companies”. The classification has been confirmed by the Mining Cadastre for companies where ZRA reported receipts in 2012 exceeding ZMW 1 million.

Based on the above, the profile of payments to ZRA is set out in the following table:

Payment threshold	Mining Companies		Non Mining Companies	
	Number of companies	Revenue collected by ZRA (ZMW million)	Number of companies	Revenue collected by ZRA (ZMW million)
Amount > ZMW 500 million	5	5,940	-	-
ZMW 100 million <Amount <ZMW 500 million	5	878	-	-
ZMW 50 million <Amount <ZMW 100 million	4	290	-	-
ZMW 10 million <Amount <ZMW 50 million	8	193	2	38
ZMW 5 million <Amount <ZMW 10 million	3	28	-	-
ZMW 2 million <Amount <ZMW 5 million	4	13	2	7
ZMW 1 million <Amount <ZMW 2 million	-	-	4	5
ZMW 0.5 million <Amount <ZMW 1 million	6	4	-	-
Amount <ZMW 0.5 million	42	4	28	2
Total	77	7,350	36	52

The profile of payments to ZRA in 2012, based on receipts from mining companies after excluding the non mining-companies, is set out in the following table:

Threshold	Number of companies	Revenue collected by ZRA (ZMW'000)	Weight / total collected revenue	Cumulative weighting
Amount > ZMW 500 million	5	5,940	80.82%	80.82%
ZMW 100 million <Amount <ZMW 500 million	5	878	11.94%	92.76%
ZMW 50 million <Amount <ZMW 100 million	4	290	3.95%	96.71%
ZMW 10 million <Amount <ZMW 50 million	8	193	2.63%	99.34%
ZMW 5 million <Amount <ZMW 10 million	3	28	0.38%	99.72%
ZMW 2 million <Amount <ZMW 5 million	4	13	0.18%	99.89%
ZMW 1 million <Amount <ZMW 2 million	-	-	0.00%	99.89%
ZMW 0.5 million <Amount <ZMW 1 million	6	4	0.05%	99.94%
Amount <ZMW 0.5 million	42	4	0.06%	100.00%
Total	77	7,350	100%	

According to the above table, the companies paying taxes of more than **ZMW 1 million** represent **99.89%** of the total revenue collected by ZRA from companies operating in the extractive sector. The 2011 reconciliation sets a materiality threshold ZMW 2 million in order to cover 99.78% of initially reported payments to ZRA.

The materiality threshold recommended above means that mining companies making **99.89%** of reported payments to ZRA will be included in the reconciliation i.e. all companies making payments

to ZRA in excess of **ZMW 1 million** (approx. USD 170,000). Accordingly 29 mining companies were selected for the 2012 reconciliation exercise.

Mining entities, including those operating in artisanal mining sector, which have made payments below the ZMW 1 million threshold to ZRA, are included in this report through unilateral disclosure by Government Entities and ZCCM-IH.

4.3. Reconciliation scope

Based on the scoping study, ZEC agreed that the reconciliation should cover the following areas.

4.3.1. Taxes and Revenues Covered

According to the section above, the flows included in the 2012 reconciliation scope may be summarised as follows:

Ref	Type of Tax	Description
Payments to MMEWD		
1	Application Fees	Fees paid when applying for a prospecting license or mining license.
2	Licence Fees	Fees payable by an applicant of mining rights to be granted a mining license or permit.
3	Area Charges	Fees payable by all Extractive Companies to MMEWD in order to obtain the appropriate permit to undertake the mining and exploration operations.
4	Valuation Fees	Fees paid for laboratory analysis of mineralogical samples.
5	Annual Operating Permit	Annual fee payable by all Extractive Companies to MMEWD in order to obtain the appropriate permits from the Director of Mines Safety to undertake mining operations.
6	Environmental Protection Fund	Fee charged to Extractive Companies for environmental rehabilitation purposes.
7	Other fees & charges	To be used by Government Entities and mining companies in case there were any material receipts or payments not listed elsewhere on the ZEITI template (> ZMW 50 million).
Payments to ZRA		
8	Pay- As-You-Earn	Tax paid by employees on all their emoluments. The employer acts as an agent for the Government and deducts the tax from the employee emoluments which it remits to ZRA.
9	Import VAT	Value Added Tax paid by Extractive Companies on the import of goods into Zambia including imports of minerals and concentrate from other jurisdictions.
10	Mineral Royalty	Royalty payable is calculated at 3% of the market value of minerals FOB less the cost of smelting, refining and insurance, handling and transport from the mining area to the point of export or delivery within Zambia. Royalty payments may be deferred if the cash operating margin of a holder of a Large Scale Mining falls below zero.
11	Company Income Tax (including Provisional Tax)	All Extractive Companies are taxed on their taxable income which is determined in line with the Zambian Income Tax Act. Income in this case relates to revenue less all tax allowable expenditure. The company tax rates are 30% for mining incomes and 35% for hedging incomes. This also includes the compulsory instalments paid during the year as a provisional tax.
12	VAT	This payment type refers to the net Output VAT payable by the Extractive Companies, after taking into account Input VAT incurred on business purchases and/or business expenditure.
13	Import/Customs Duty	Customs/Import duty is a tax levied on ZRA specified goods imported into Zambia.
14	Withholding Taxes	This is a tax where any person or company making certain payments is required to deduct from such payments and remit to ZRA. The payments that attract WHT include management and consultant fees, commissions, rent dividends and payments to non-resident contractors. The WHT rate is 15%.
15	Excise Duty	Excise duty is a tax levied on ZRA specified goods imported into Zambia.
16	Wind Fall Tax	A tax levied against extractive industries triggered by favourable global economic conditions which allows these industries to experience above average commodity prices. This tax was introduced by the Mines and Minerals Act 2008 and abolished on 1 April 2009. After discussion with the Government, the mining companies have agreed to pay their tax arrears arising from the changes that were introduced in 2008. The Windfall arrears were re-assessed at 25% only to ensure that the assessed total liability does not exceed the 47% effective tax rate intended by the Government.
17	Variable profit Tax	This is a tax on company profits charged under the Income Tax Act. The company tax rate is 30%. Variable profit tax rate applies for profits that go above 8% of the gross sales. ZRA has

Ref	Type of Tax	Description
		a formula to calculate the variable profit above the threshold. Variable profit tax can go up to a maximum of 45%.
18	Advance Income Tax	A 6% advance income tax is levied on commercial imports, subject ministerial remission. Where paid, this tax may be deducted from the taxpayer's final income tax for the fiscal year.
19	Export Levy	This tax is levied at 10% on concentrate minerals.
20	Other taxes (ZRA)	To be used by Government Entities and mining companies in case there are any material receipts or payments not listed elsewhere on the ZEITI template (> ZMW 50 million).
Payments to Local Councils		
21	Annual Business Fees	Operating fees paid to the local councils in which the Extractive Companies operate.
22	Property Rates	Property taxes payable to the local authority by all Extractive Companies who own properties.
Payments to MoL		
23	Ground Rent	Annual lease payments made to the Ministry of Lands in respect of leasehold properties owned by the Extractive Companies.
24	Consideration Fees	These are fees paid to show that the offeree to land has accepted the offer. They are only paid once at the beginning when the land has been offered. In short, payment of these fees symbolises acceptance of offer to buy land.
25	Registration Fees	These are service charges that go towards the process of registration and formulation of the certificate of title at the Lands Deeds Department.
26	Preparation fees	These are service charges towards the preparation of the lease document by the office of the Commissioner of Lands before it goes to the Lands and Deeds Department for final registration and formulation.
Payments to MoF		
27	Dividends from Government Shares	This is the distribution of profits in proportion to the shares held directly in the Extractive Company and ZCCM-IH by GRZ.
28	Revenues from GRZ shareholding sale	This relates to revenues received by GRZ from the transfer of the shares held in State owned companies operating in the mining sector.
Payments to ZCCM-IH		
29	Dividends from ZCCM-IH Shares	This is the distribution of profits in proportion to the shares directly held in the Extractive Company by ZCCM-IH.
30	Price participation fees	Price participation fees received from the companies in which it has shareholding.
31	Revenues from ZCCM-IH shareholding sale	This relates to revenues received by ZCCM-IH from the transfer of the shares held in Extractive Companies operating in Zambia including in their parent companies (Exp : Equinox Minerals Limited).
32	Revenues from ZCCM-IH mining rights transfer	This relates to revenue received by ZCCM-IH from the transfer of the mining rights held.
Social Payments		
33	Corporate Social Responsibility In kind payments	These flows affect all contributions made by extractive companies in the local development area including expenditure incurred by extractive companies to finance infrastructure projects, health, education, roads, and market gardening for individuals.
34	Corporate Social Responsibility cash payments	These flows relate to contributions made by extractive companies in the local development. Flows covered in this section include: cash payments made by extractive companies to support actions of local communities including compensation others that those granted directly for the individuals.

4.3.2. Extractive Companies

To ensure the comparability between the 2012 and 2013 in terms of revenues reconciled we propose to include in the 2012 reconciliation scope, the “LIONS GROUP QUARRIES LIMITED” selected in the 2013 reconciliation scope although its payment was not provided by ZRA in 2012.

According to the above, thirty (30) companies are selected for the 2012 reconciliation exercises. These companies are listed below:

N°	Name of Extractive company
<u>Operating companies</u>	
1	KANSANSHI MINING PLC
2	KONKOLA COPPER MINES PLC
3	FIRST QUANTUM MINING AND OPERATIONS LTD-BM M S
4	MOPANI COPPER MINES PLC
5	LUMWANA MINING COMPANY LIMITED
6	CHIBULUMA MINES PLC
7	LAFARGE CEMENT ZAMBIA PLC
8	NFC AFRICA MINING PLC
9	KAGEM MINING LIMITED
10	CNMC LUANSHYA COPPER MINES PLC
11	ZAMBEZI PORTLAND CEMENT LIMITED (*)
12	LIONS GROUP QUARRIES LIMITED (*)
13	SCIROCCO ENTERPRISES LIMITED
14	LUBAMBE COPPER MINE LIMITED
15	CHAMBISHI METALS PLC
16	SINO-METALS LEACH ZAMBIA LTD
17	NDOLA LIME COMPANY LIMITED
18	MAAMBA COLLIERIES LIMITED
19	SAN HE (ZAMBIA) LIMITED
20	SABLE ZINC KABWE LIMITED
21	ALBIDON ZAMBIA LIMITED
22	KALUMBILA MINERALS LIMITED
23	GRIZZLY MINING LIMITED
24	DOLOMITE AGGREGATES LIMITED(*)
25	UNIVERSAL MINING & CHEMICAL INDUSTRIES LIMITED
26	CHAMBISHI COPPER SMELTER LIMITED
27	DENISON MINES ZAMBIA LIMITED (*)
<u>Exploring companies</u>	
28	BHP BILLITON WORLD EXPLORATION INC
29	ZAMBIAN NONFERROUS METALS EXPLORATION & CON CO LTD
<u>State owned Company</u>	
30	ZCCM-IH

(*)New companies included in the 2012 reconciliation report.

For extractive companies which have made payments below ZMW 1 million to ZRA, we recommend the disclosure by Government Entities and ZCCM-IH of the combined benefit stream from the companies listed in Annexes 4 and 6 in accordance with EITI Requirement 4.2.b.

4.3.3. Government Entities

Based on the scope detailed above, the Government Entities that were required to report for the 2012 EITI Report are:

Central Entities	
1	Zambian Revenue Authority (ZRA)
2	Ministry of Mines, Energy and Water Development
3	Ministry of Lands
4	Ministry of Finance
Stated owned company

5. RECONCILIATION RESULTS

We present below detailed results of our reconciliation exercise, as well as differences noted between amounts paid by extractive companies and amounts received by Government entities. We have highlighted the amounts initially reported and the adjustments made following our reconciliation work, as well as the final amounts and unreconciled differences.

5.1. Payment Reconciliation Between Mining Companies and Government Entities

5.1.1. Reconciliation by Extractive Company

The tables below summarise the differences between the payments reported by extractive companies and receipts reported by the various Government Entities.

The tables include consolidated figures based on the reporting templates prepared by every extractive company and Government entity, the adjustments made by us following our reconciliation work and the residual, unreconciled differences. In order to keep the report size reasonable, detailed reconciliation reports for each company are included in Annex 8 of this report.

Amounts in ZMW

Company	Templates originally lodged			Adjustments			Final amounts

Unadjusted residual differences are detailed in Section 5.1.4 of this report

5.1.3. Adjustments

(i) Extractive Company Adjustments

The adjustments were carried out on the basis of confirmations from extractive companies and Government Entities and were supported by adequate evidence wherever deemed appropriate. The adjustments made are detailed as follows:

Adjustments to extractive company payments	Total amount ZMW
Tax amount incorrectly reported (a)	94,526,494
Tax paid not reported (b)	68,894,697
Tax paid reported but outside the period covered (c)	(35,578,812)
Tax paid reported but outside the reconciliation scope (d)	2,898,678
Total added/deducted to amounts originally reported	130,741,057

(a) Tax amount incorrectly reported

These amounts were incorrectly reported in the reporting templates. The adjustments were mainly made to the negative amounts reported by MOPANI COPPER MINES PLC as VAT (net paid) to ZRA for ZMW 89,240,778.

We set out in the table below a summary of the most important adjustments made to company' payments:

Company	Tax amount incorrectly reported
Mopani Copper Mines Plc	89,267,073
CNMC Luanshya Copper Mines Plc	3,927,783
Other	1,331,638
Total adjustments	94,526,494

(b) Tax paid not reported

These are payment flows reported by Government Entities but were not reported by extractive companies. We set out in the table below a summary of the most important adjustments made to companies' payments:

Company	Tax paid not reported
FQM	18,018,055
Chibuluma Mines Plc	18,200,903
Mopani Copper Mines Plc	13,886,722
Chambishi Metals Plc	6,503,886
Maamba Collieries Limited	5,262,111
Kagem Mining Limited	4,050,407
Others	2,972,613
Total adjustments	68,894,697

After receiving and examining details of payments sent by extractive companies, we noted that the amounts originally recorded in the reporting templates were incorrect. Several taxes were underreported including Dividends from ZCCM-IH Shares, Property Rates, VAT (Net paid) and Pay- As-You-Earn and others. We therefore made adjustments to reported payments based on confirmations from the companies and/or a review of the supporting documents.

(c) Tax paid reported but outside the period covered

These are payments reported, but which fall outside the reconciliation period, i.e. before 1 January 2012 or after 31 December 2012. We set out in the table below a summary of the most important adjustments made to companies' payments:

Company	Tax paid reported but outside the period covered
FQM	(24,950,811)
MOPANI COPPER MINES PLC	(3,961,129)
LUBAMBE COPPER MINE LIMITED	(2,891,354)
KALUMBILA MINERALS LIMITED	(1,074,670)
CHAMBISHI METALS PLC	(966,000)
KAGEM MINING LIMITED	(888,945)
Other	(845,903)
Total adjustments	(35,578,812)

(d) Tax paid but outside the reconciliation scope

These are adjustments made to amounts reported but not foreseen in the reporting templates or not relating to the extractive activities.

Revenue stream	Tax paid reported but outside the reconciliation scope
MMEWD	(62,181)
Licence Fees	(6,381)
Valuation Fees	(55,800)
ZRA	2,987,225
VAT (Net paid)	2,987,225
MoL	(26,366)
Registration Fees	(26,366)
Total adjustments	2,898,678

(ii) Government Entities' adjustments

The adjustments were carried out on the basis of confirmations received from extractive companies or from Government Entities and supported by payment receipts wherever deemed appropriate. These adjustments are detailed as follows:

Adjustments to Government payments	Total amount ZMW
Tax received not reported (a)	75,444,902
Tax received reported but outside the reconciliation scope (c)	(12,770,018)
Tax amount incorrectly reported (d)	2,079,618
Total added/deducted to amounts originally reported	64,754,502

(a) Tax received not reported

These are payment flows reported by extractive companies but which were not reported by Government Entities. We set out in the table below a summary of the most important adjustments made to Government Entities' initial reporting:

Revenue stream	Tax received not reported
Ministry of Mines, Energy and Water Development	885,330
Licence Fees	64,157
Environmental Protection Fund	821,173
Zambian Revenue Authority (ZRA)	65,617,051
Pay- As-You-Earn	1,887,029
Mineral Royalty	58,725,661
Withholding Taxes	5,004,361
Local Councils	6,305,727
Annual Business Fees	649,999
Property Rates	5,655,728
Ministry of Lands	2,636,794
Ground Rent	2,512,734
Consideration Fees	124,060
Total adjustments	75,444,902

The amounts initially recorded in the reporting templates were incorrect. The table above shows that several payments were under reported mainly Mineral royalties and Withholding Taxes paid to ZRA.

These adjustments were made based on confirmations received from the Government Entities and/or a review of the supporting documents.

(b) Tax received and reported but outside the reconciliation scope

These are adjustments made mainly to amounts reported by ZRA and Ministry of Lands receipts from UMCIL. We found that the company is a steel manufacturer and its mining operations have not yet started and production is expected for 2015. Therefore, only receipts reported by MMEWD were included in the reconciliation scope.

(c) Tax amount incorrectly reported

These are mainly Property Rates incorrectly reported as received from MOPANI COPPER MINES PLC by Mufulira Municipal Council. We found out that a difference amounting to ZMW 2,098,834 was reported by the council in the detail sheet but not included in the reporting template.

5.1.4. Summary of the unreconciled discrepancies

Following our adjustments, the total unreconciled discrepancies of payments amounted to **ZMW (93) million** representing **(1.20%)** of total payments reported by Government Entities. This is the sum of positive differences of **ZMW 190 million** and negative differences amounting to **ZMW (283) million**. These unreconciled differences can be analysed as follows:

	Total payments (ZMW)
Tax not reported by the extractive company (a)	(163,860,444)
Missing extractive company detail by payment (b)	154,792,982

	Total payments (ZMW)
Reporting template not submitted by the extractive company (c)	(42,524,675)
Tax reported by the Govt not confirmed by the company (d)	(74,462,892)
Tax not reported by the Govt Body (e)	35,038,099
Other	(2,241,421)
Total differences	(93,258,351)

(a) Tax not reported by the extractive companies

These differences relate mainly to Import VAT declared by ZRA Customs for an amount of ZMW 138,493,926. In most of the cases we were unable to confirm the amounts declared by the companies, given the lack of their feedback despite several reminders from us. We present in the table below a breakdown of the unreconciled differences by company of the unreconciled Import VAT:

Company	Tax not reported by the extractive company
SABLE ZINC KABWE LIMITED	(128,004,560)
LAFARGE CEMENT ZAMBIA PLC	(26,179,090)
SCIROCCO ENTERPRISES LIMITED	(4,733,987)
NFC AFRICA MINING PLC	(3,778,731)
Other	(1,164,076)
Total unreconciled differences	(163,860,444)

(b) Detail of payments not submitted by extractive companies

These differences relate to the following companies which reported customs duties and taxes without detail by receipt number. Consequently, the data submitted were not reconcilable.

Company	Detail of payments not submitted by extractive companies	Import VAT	Import/Customs Duty	Excise Duty
LUBAMBE COPPER MINE LIMITED	135,042,485	-	135,042,485	-
MOPANI COPPER MINES PLC	15,572,653	13,782,733	1,789,920	-
KALUMBILA MINERALS LIMITED	7,640,751	7,372,975	267,776	-
NDOLA LIME COMPANY LIMITED	(3,297,675)	(2,764,022)	(533,653)	-
CHAMBISHI COPPER SMELTER LIMITED	1,039,145	366,956	672,189	-
MAAMBA COLLIERIES LIMITED	(559,146)	(559,146)	-	-
KONKOLA COPPER MINES PLC	(423,883)	(446,025)	719,084	(696,942)
SAN HE (ZAMBIA) LIMITED	(221,348)	(221,348)	-	-

(c) Reporting template not submitted by extractive companies

This final unreconciled difference relates to ZAMBEZI PORTLAND CEMENT LIMITED which failed to submit its reporting templates. The receipts reported by Government Entities in respect of this company, amounted to ZMW 42,524,675 representing 0.53% of the total extractive sector revenue:

(d) Taxes reported by the Government not confirmed by the companies

These differences relate mainly to Import VAT declared by ZRA Customs for an amount of **ZMW 64,190,864** which was not confirmed by LUBAMBE COPPER MINE LIMITED.

(e) Taxes not reported by Government Entity

These differences relate mainly to taxes and mineral royalties paid to ZRA. In most of the cases we were unable to confirm the amounts declared with the final beneficiary, given that the companies were unable to make supporting documents available to us.

5.1.5. Detail of residual differences

We set out in the table below details of the unreconciled differences by company:

Amounts in ZMW

Company	Unreconciled difference	Reporting template not submitted by the extractive company	Detail of payments not submitted by extractive companies	Tax not reported by the extractive company	Tax not reported by the Govt Body	Tax reported by the Govt not confirmed by the company	Other
KANSANSHI MINING PLC	357 097	-	-	-	376 796	-	(19 699)

5.2. Payment reconciliation between mining companies and ZCCM-IH

We present below detailed results of our reconciliation exercise between Dividends paid by extractive companies and those received by ZCCM-IH. We have highlighted the amounts initially reported and the adjustments made following our reconciliation work.

Company	Templates originally lodged			Adjustments			Final amounts		
	Company	ZCCM-IH	Difference	Company	ZCCM-IH	Difference	Company	ZCCM-IH	Difference
KANSANSHI	197,588,430	80,048,646	117,539,784	-	117,539,784	(117,539,784)	197,588,430	197,588,430	-
KCC	13,400,549	13,400,549	-	-	-	-	13,400,549	13,400,549	-
FQM	-	117,539,784	(117,539,784)	-	(117,539,784)	117,539,784	-	-	-
MCM	-	5,250,000	(5,250,000)	5,250,000	-	5,250,000	5,250,000	5,250,000	-
CHIBULUMA MINES PLC	-	17,098,639	(17,098,639)	17,098,639	-	17,098,639	17,098,639	17,098,639	-
Total	210,988,979	233,337,618	(22,348,639)	22,348,639	-	22,348,639	233,337,618	233,337,618	-

The adjustments were carried out on the basis of confirmations from extractive companies and Government Entities and were supported by adequate evidence.

For the dividends made in foreign currency, the reporting entities were required to report in the currency of payment. These payments have been converted to ZMW at the average rate for the period per Oanda of USD 1: 5,06637. We present below details of dividends paid to ZCCM in the currency of payment:

Date	Company	Dividends received in ZMW	Dividends received in USD	Dividends received in USD converted to ZMW	Total Dividends
20/03/2012	Chibuluma Mines		375,000	1,899,889	1,899,889
14/06/2012	Chibuluma Mines	7,538,250		-	7,538,250
19/09/2012	Chibuluma Mines	2,200,500		-	2,200,500
27/12/2012	Chibuluma Mines	5,460,000		-	5,460,000

02/10/2012	FQM		23,200,000	117,539,784	117,539,784
21/12/2012	Mopani Copper Mines	5,250,000		-	5,250,000
		20,448,750	42,020,000	212,888,868	233,337,618

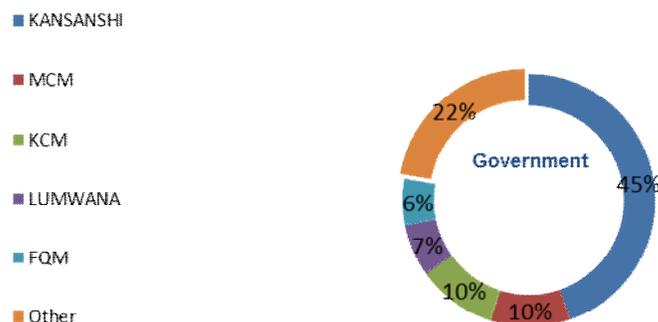

6. REPORTED DATA

6.1. Analysis of Government Revenues

6.1.1. Analysis of Payments by Companies' Contribution

The analysis of Government revenues by companies' contribution indicates that 5 companies contributed approximately 78% to the total Government revenues in 2012 and that Kansanshi Mining Plc accounts for almost 45% of the country's extractive revenues for that period.

TOP 5 Extractive Companies

The list of payments by company is shown in the table below:

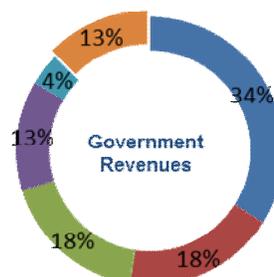

Company	Amounts in ZMW	
	Government receipts (ZMW)	% of total payment
KANSANSHI MINING PLC	3 589 666 567	44,76%
MOPANI COPPER MINES PLC	818 441 071	10,21%
KONKOLA COPPER MINES PLC	814 627 173	10,16%
LUMWANA MINING COMPANY LIMITED	537 850 985	6,71%
FIRST QUANTUM MINING AND OPERATIONS LTD-BM M S	480 032 962	5,99%
LAFARGE CEMENT ZAMBIA PLC	248 132 182	3,09%
CHAMBISHI METALS PLC	229 628 712	2,86%
CHIBULUMA MINES PLC	208 950 920	2,61%
SABLE ZINC KABWE LIMITED	137 575 957	1,72%
CNMC LUANSHYA COPPER MINES PLC	123 632 600	1,54%
LUBAMBE COPPER MINE LIMITED	105 794 850	1,32%
NFC AFRICA MINING PLC	94 910 850	1,18%
KAGEM MINING LIMITED	82 409 158	1,03%
CHAMBISHI COPPER SMELTER LIMITED	69 985 253	0,87%
KALUMBILA MINERALS LIMITED	59 881 325	0,75%
ZAMBEZI PORTLAND CEMENT LIMITED	42 524 675	0,53%
NDOLA LIME COMPANY LIMITED	28 933 594	0,36%
MAAMBA COLLIERIES LIMITED	22 711 227	0,28%
SINO-METALS LEACH ZAMBIA LTD	19 788 867	0,25%
BHP BILLITON WORLD EXPLORATION INC	18 227 804	0,23%
SCIROCCO ENTERPRISES LIMITED	15 426 437	0,19%
ZAMBIAN NONFERROUS METALS EXPLORATION & CON CO LTD	13 070 195	0,16%
ZCCM-IH	7 397 126	0,09%
ALBIDON ZAMBIA LIMITED	6 380 203	0,08%
LIONS GROUP QUARRIES LIMITED	5 989 497	0,07%
GRIZZLY MINING LIMITED	3 030 185	0,04%
DENISON MINES ZAMBIA LIMITED	2 380 064	0,03%
DOLOMITE AGGREGATES LIMITED	2 272 735	0,03%
SAN HE (ZAMBIA) LIMITED	495 183	0,01%
UNIVERSAL MINING & CHEMICAL INDUSTRIES LIMITED	37 787	0,00%
Social payments unilaterally declared by extractive companies	218 233 357	2,72%
Receipts from non-reconciled companies unilaterally declared by Government Entities	10 996 095	0,14%
Total extractive sector	8 019 415 596	100%

6.1.2. Analysis of Payments by Contribution Flows

The analysis of the payments by contribution flows shows that the top 5 taxes contributed 88% to the total Government extractive revenues collected by ZRA. We also note that Company Income tax accounts for the highest proportion of total government revenue (34%).

TOP 5 Taxes

- Company Income Tax (Inc. Provisional Tax)
- Mineral Royalty
- Import VAT
- Pay- As-You-Earn
- VAT (Net paid)
- Other

The list of payments by contribution flow is shown in the table below:

Amounts in ZMW

Tax	Government receipts (ZMW)	% of total payment
Company Income Tax (Inc. Provisional Tax)	2 729 861 106	34,04%
Mineral Royalty	1 475 859 263	18,40%
Import VAT	1 423 202 547	17,75%
Pay- As-You-Earn	1 067 422 323	13,31%
VAT (Net paid)	313 490 920	3,91%
Import/Customs Duty	305 859 321	3,81%
Dividends from ZCCM-IH Shares	233 337 618	2,91%
Withholding Taxes	134 051 093	1,67%
Property Rates	70 332 557	0,88%
Excise Duty	21 462 068	0,27%
Property Transfer Tax	6 267 324	0,08%
Ground Rent	3 105 097	0,04%
Export Levy	1 810 937	0,02%
Area Charges	1 294 076	0,02%
Environmental Protection Fund	1 358 245	0,02%
Annual Business Fees	1 038 145	0,01%
Valuation Fees	150 123	0,00%
Licence Fees	66 326	0,00%
Advance Income Tax	52 071	0,00%
Annual Operating Permit	16 740	0,00%
Application Fees	11 610	0,00%
Consideration Fees	136 059	0,00%
Preparation fees	299	0,00%
Registration Fees	276	0,00%
Wind Fall Tax	-	0,00%
Variable profit Tax	-	0,00%
Dividends from Government Shares	-	0,00%
Revenues from GRZ shareholding sale	-	0,00%
Price participation fees	-	0,00%
Revenues from ZCCM-IH shareholding sale	-	0,00%
Revenues from ZCCM-IH mining rights transfer	-	0,00%
Social payments unilaterally declared by extractive companies	218 233 357	2,72%
Receipts from non-reconciled companies unilaterally declared by Government Entities	10 996 095	0,14%
Total extractive sector	8 019 415 596	100%

6.1.3. Analyses of Revenues by Government Entities

During 2012, ZRA collected the largest value of receipts included in the reconciliation followed by ZCCM-IH as shown in the table below:

Amounts in ZMW

Government Entities	Government receipts (ZMW)	% of total payment
Zambian Revenue Authority (ZRA)	7,488,742,294	95.98%
ZCCM- IH	233,337,618	2.99%
Local Councils	71,370,702	0.91%
Ministry of Lands	3,241,731	0.04%
Ministry of Mines, Energy and Water Development	5,882,662	0.08%
Ministry of Finance and National Planning	-	0.00%
Total extractive sector	7,802,575,007	100%

(*) This total does not include the social payments

6.1.4. Analyses of revenues declared by Local Councils

According to the above table, the contribution of the Local Councils through the Property Rates and Annual Business Fees collected from the extractive companies to the total extractive revenue is immaterial. However, these payments were included in the reconciliation scope because they are important to the areas served by Local Councils.

We present in the table below details of these receipts by Local Council:

Local Council	Property rates (ZMW)	Annual Business Fees (ZMW)
Mufurila Municipal Council	8,405,344	35,328
Kalulushi Municipal Council	4,597,701	-
Kitwe City Council	5,902,104	-
Chililabombwe Municipal Council	6,014,249	-
Luanshya Municipal Council	5,437,286	-
Chingola Municipal Council	9,157,708	335,368
Kabwe Municipal Council	76,785	-
Mazabuka Municipal Council	204,000	584
Ndola City Council	4,435,168	24,000
Lufwanyama District Council	890,600	-
Lusaka City Council	9,080	53,369
Mumbwa District Council	1,011,600	-
Sinazongwe District Council (*)	13,977	-
Solwezi Municipal Council	23,132,951	10,650
Kafue District Council	1,042,004	241,703
Chilanga District Council	-	337,143
Choma Municipal Council	2,000	-
Total	70,332,557	1,038,145

6.1.5. Unilateral disclosure of revenues by Government Entities

Government Entities were requested to disclose unilaterally revenue streams collected from companies but not included within the reconciliation scope in accordance with EITI Requirement 4.2.b. Details of payments by Company are set out in the table below:

Amounts in ZMW

Extractive Company	ZRA Domestic (million ZMW)	ZRA Customs (million ZMW)	MMEWD (million ZMW)	Total
SAKIWA MUSIWA	-	-	984,609	984,609

Total	154,357,072	63,876,285	218,233,357

6.3. Analysis of production data²⁵

According to the newly appointed Mineral Economics Team, the data captured by the Mines Development Department for large scale sector during 2012 was based only on copper concentrates and/or total cathodes produced leaving out other details requested for the 2012 ZEITI report. As a result, this new team was not in a position to provide us with explanations with regards to the discrepancies arising between the production quantities provided by the mining companies and those declared by the Mines Development Department.

On the basis of data reported by extractive companies, we present below the production quantities by mining company and by mineral type:

Copper

Company	Total extracted in Metric Tonne (Zambia's Own)	%
KANSANSHI	261,351	38%
KCM	157,995	23%
MCM	98,970	14%
LUMWANA	87,588	13%
CNMC	23,511	3%
NFC	26,152	4%
CHIBULUMA	17,932	3%
SINO-METALS	5,186	1%
LUBAMBE	3,221	0%
Total	681,906	100%

(*)Production values are not communicated

Cobalt

Company	Total extracted in Metric Tonne (Zambia's Own)	%
KCM	1,439	21%
MCM	69	1%
Total	1,508	100%

(*)Production values are not communicated

Other Minerals

Company	Mineral	Unit	Production Quantity
KANSANSHI MINING PLC	Gold	Troy Ounces	136,056
KONKOLA COPPER MINES PLC	Pyrite	Tonne	16,304
LAFARGE CEMENT ZAMBIA PLC	Limestone	Tonne	1,756,290
	Phyllite	Tonne	45,496
	Shale/Phyllite	Tonne	87,354
KAGEM MINING LIMITED	Emerald	Kg	1,474
	Emerald/Premium	Kg	45

²⁵ Toll, purchased and imported production excluded

Company	Mineral	Unit	Production Quantity
	Beryl-I	Kg	2,325
	Beryl-II	Kg	1,513
	Specimen	Kg	26

Total				1,285

n/r : not reported by the company

7. RECOMMENDATIONS

7.1. Lessons learned from the 2012 Reconciliation

7.1.1. Councils Declaration of Received Payment Flows

We noted some anomalies during the review of payments reported by Local Councils, such as:

- auditor certification date prior to management sign off date on the reporting templates;
- failure to submit payment reporting schedules, hard copies or lack of dates in respect of management sign off seal/stamp;
- management sign off date and auditor certification date both preceding the date of the issue of the reporting templates;
- some reporting templates were prepared using the old reporting template format; and
- amounts reported were not allocated to any extractive company.

We recommend that relevant Local Councils review their systems for reporting information relating to tax payment flows for ZEITI reconciliation purposes. This could be complemented by ensuring that officials attend the EITI training workshop and follow the instructions for the completion of the reporting templates, in order to ensure that data provided is more accurate and reliable.

7.1.2. Reporting deadlines not met by Government Entities and Extractive Companies

Despite chasing up reporting templates by both e-mails and telephone calls, neither Government Entities nor extractive companies submitted their reporting templates by the stipulated deadline. We list out below instances of significant delays we came across in addition to many cases where both parties failed to submit reporting templates altogether:

- only 4 extractive companies out of 30, 6 Councils out of 16 and one (Central) Government Entity out of 4 replied and submitted their reporting templates duly filled in by the agreed deadline of 5 September 2014;
- five companies have yet to submit their reporting templates by the date our draft reconciliation report was issued;
- we incurred major delays in getting feedback and obtaining comments from most extractive companies in order to reconcile discrepancies;
- some extractive companies and some central Government Entities (ZRA Domestic, ZRA Customs and the Ministry of Mines) failed to revert with answers to our queries on the discrepancies; and
- the Ministry of Lands submitted its reporting template on 15 October 2014 i.e with a delay of over a month.

We recommend that ZEITI puts in place a legal framework enforcing sanctions against parties which fail to cooperate with the ZEITI reconciliation process requirements. This measure would encourage more participants to assist and work alongside the ZEITI Secretariat's endeavours in raising awareness regarding the importance of the reconciliation process.

7.1.3. Enactment of EITI reporting regulations

We understand that the EITI reporting obligations are not covered in the current Extractive Sector Legislation of 23 March 2011. This is one of the main reasons which led to delays and/or failure to submit EITI reporting templates by some extractive companies.

We recommend a review of the mining regulation by introducing EITI reporting provisions such as:

- *reporting obligations for extractive companies and government entities alike, while specifying the level of disaggregation of the data to be submitted; and*
- *a timeframe set for updating and publishing forms and instructions and selection of the reporting entities and submission of declarations and completion of all reconciliation work.*

7.1.4.Accuracy of Production data

We understand that the production data provided by Ministry of Mines was based on self-declarations submitted from the extractive companies. The Ministry does not have its own procedure and system to collect and control production data reported by mining companies.

In addition to declarations submitted, we recommend that the Ministry of Mines:

- *develops procedures and systems to collect and control production data; and*
- *provides us with a comparison of the production volumes declared extractive companies with the measurements made by Ministry of Mines throughout the year.*

7.2. Follow up of the recommendations of the 2011 EITI Report

Recommendation	Implemented (Yes/no/ongoing)	Description of action undertaken
<p>Regulation of sub-national transfers</p> <p>In accordance with Section 136 of the Mines and Minerals Development Act 2008, the Minister of Finance shall, in consultation with the Minister responsible for Mines, establish a mineral royalty sharing mechanism for distributing royalty revenues.</p> <p>We note, however, that there is no provision within the legislation as to what this mechanism should be, thus leaving a legal vacuum on the modalities of the handing over and the percentage shareholding that should be transferred by the central government. As a result, sub national transfers are not yet formalised, nor effective.</p> <p>We recommend setting up the adequate provisions providing guidance for sharing and management of these resources. There should be measures in place to ensure transparency in the system of transfer to local councils and their reconciliation in the EITI process.</p>	Ongoing	No action has been undertaken by the Government as yet to implement the mineral sharing mechanism. Through engaging civil society stakeholders, ZEITI, CTPD (Center for Trade Policy and Dialogue) and the CSO-EITI Forum have had discussions involving Government particularly Ministry of Local Government and Housing, Ministry of Finance to make progress towards establishing such a mechanism.
<p>ZEITI database</p> <p>We note that to date the ZEITI Secretariat still does not have a comprehensive database of all extractive companies operating in the mining sector, despite this recommendation having been made in the previous. We understand that this is due to the lack of formal communication with Governmental Bodies with regard to the extractive companies operating in the mining sector. In some cases making contact with extractive companies can be difficult as no contact details are available.</p> <p>We recommend that, in the first instance, the ZEITI Secretariat should create its database following our reconciliation exercise. The Secretariat should then liaise with the Government Entities to ensure it obtains adequate information regularly and updates its database accordingly. To this end, we believe it is vital that any new entrants to the mining sector are registered with the ZEITI Secretariat as part of the process before or at the same time as they obtain their operating licence. The ZEITI Secretariat should perform quarterly review with the Government Entities of the list of extractive companies licensed to operate in the sector is recommended.</p>	Ongoing	The ZEITI has started the process of establishing a database including companies' profiles from the current scope, licencing information, statistics and production data, beneficial ownership, contracts information. ZEC aims to include a link to the Cadastre portal on the ZEITI website to enable public access and to gain current sector information access. ZEC aims to progressively enlarge its mining companies scope towards full sector disclosure.

Recommendation	Implemented (Yes/no/ongoing)	Description of action undertaken
<p>Supporting data</p> <p>The instructions sent out with the reporting templates to extractive companies indicated that when compiling their templates, extractive companies should provide us with schedules showing a breakdown of all amounts included.</p> <p>Although many extractive companies provided us with these schedules, we note that the new entrants were not diligent in complying with this requirement. We chased up most of the non-compliant extractive companies again during subsequent reminders.</p> <p>We recommend a review of the procedures for communicating in particular with those who use a clearing agent for their tax payments. The clearing agents must provide regular details of payments made on behalf of the relevant mining company (excluding their fees). A regular compulsory briefing or training seminar for new comers might be an option.</p>	No	Such issues relate mostly to ZRA customs tax categories where middle clearing agents are involved. These clearing agents should be better immersed and familiarised with the process requirements to provide the payments information in the needed format.
<p>Lack of Audit Certificates</p> <p>Although it was clearly stated during the workshop that extractive companies should submit their tax templates accompanied by an audit certificate, only two of those extractive companies which submitted a template also provided the audit certificate.</p> <p>Similarly, the Government Entities' tax templates should have been certified by the Auditor General but we note that this was not done for the main Government Entities</p> <p>We recommend for the forthcoming exercises that the extractive companies comply with this requirement, failing which ZEITI should apply sanctions against them. With regard to the Governmental Bodies, it is recommended that reliable and auditable data is presented to the Office of Auditor General before the Reconcilers start the 5th verification exercise.</p>	Ongoing	<p>ZEC proposed to include these audit/certification requirements in the EITI act and these have been included in the Draft bill. The mining companies should also include EITI reporting in their annual financial auditing plans and possibly issue EITI certificates at the time of auditing the company financial accounts.</p> <p>The government has already certified through the OAG through issuance of the letter.</p> <p>The ZEITI legislation to enforce this recommendation.</p>

Recommendation	Implemented (Yes/no/ongoing)	Description of action undertaken
<p>Unresolved differences</p> <p>At the conclusion of the Assignment, we have been unable to obtain explanations for a number of differences between government receipts and company payments. The overall value of the remaining unresolved differences was ZMW 48 million. As a proportion of the receipts reported by government, the unresolved differences amount to 0.6%. The ZEC has determined that this difference is not material in the context of the 2011 ZEITI reconciliation.</p> <p>We recommend that the ZEC should appoint a suitable independent party to examine these differences further, with a view to their resolution, and that the result of this exercise should be published. In order to maintain impetus and relevance, this exercise should ideally be completed.</p>	Ongoing	<p>The Auditor General's Office (OAG) has been following up on the reconciling items in the 2011 report. The resolution of 2011 reconciling items was still ongoing by the OAG during the process of undertaking the 2012 reconciliation by the reconcilers.</p> <p>All follow ups on all the reports will be followed up by the OAG for all future reports.</p>
<p>Non Reporting companies</p> <p>Zambezi Portland included in the scope of the reconciliation did not participate. The ZEC and, in accordance with EITI requirement 11, the government should consider whether any further action is required.</p>	Ongoing	<p>In response to the ZEITI Secretariat letter regarding the participation of Zambezi Portland in the 2012 and 2013 Zambia EITI report, the CEO explained that they are unable to participate in these exercises because their financials are being prepared. He confirmed that the company will participate in future reports.</p>

Recommendation	Implemented (Yes/no/ongoing)	Description of action undertaken
<p>Future EITI Scope</p> <p>EITI requirement 21 encourages multi-stakeholder groups in compliant countries “to explore innovative approaches to extending EITI implementation to increase the comprehensiveness of EITI reporting and public understanding of revenues and encourage high standards of transparency and accountability in public life, government operations and in business.”</p> <p>We make the following recommendations which ZEC could consider in this context, for example:</p> <ul style="list-style-type: none"> • improving the definition and reporting of production in the mining and general extractive sector; • reconciliation of the ZRA taxpayer database with the MMEWD cadastre definition and reporting of social payments by extractive companies; • inclusion of other extractive sectors in the EITI reconciliation. <p>In setting its annual work plan, ZEC should consider the progressive extension of the EITI scope.</p>	Ongoing	<p>In an effort to establish reliable sector production data, the Mineral Value Chain Project is an ongoing reconciliation of the ZRA tax payer database and MMEWD cadastre and it also involves the Chamber of Mines of Zambia. The incorporation of other extractive sectors in the EITI reconciliation is in ZEC's future work plans and these other sectors will be incorporated in future EITI reconciliations..</p>

Recommendation	Implemented (Yes/no/ongoing)	Description of action undertaken
<p>Government Audit</p> <p>Central Government</p> <p>We met the Auditor General to discuss the opinion to be given on government figures submitted on the EITI data collection templates. The OAG confirmed it would be possible to give the necessary form of assurance provided there was adequate time allowed and the work could be included in the work plan for the department's staff. We were told this would be possible for the reconciliation to be carried out in 2013, if a request were sent in good time from the ZEC.</p> <p>We recommend that the ZEC should arrange for a request to be made to the OAG in sufficient time for the OAG to plan to give the opinion on the templates for the 2011 EITI reconciliation; the request should on this basis be made during the first quarter of 2013</p> <p>Local Government</p> <p>The arrangements for audit of local government differ.</p> <p>We recommend that through the Ministry of Local Government and Housing, which is responsible for the audit of figures from local councils, the local and district councils should be encouraged to engage external auditors to audit their books. The Local Government and Housing should then be required to confirm that the information on the data templates by each local council has been audited, and to state the standards applied in carrying out the audit. In this way, the audit work done by the Office of the Auditor General, to the extent that they have carried audits on grants to local councils, would be augmented and supplemented by external audits.</p>	Ongoing	<p>OAG has been engaged prior to the start of the 2012 and 2013 reconciliation process and has agreed to undertake the necessary Government Entities audit certification due diligences.</p> <p>The Ministry of Local Government and Housing is the institution which has been mandated to undertake audits of local councils as per the Local Government Act 1991. Additionally, most district and local councils have limited financial capacities to appoint independent auditors and this would also require some amendments to the Local government Act.</p>

Recommendation	Implemented (Yes/no/ongoing)	Description of action undertaken
<p>Mining Cadastre</p> <p>The licensing information provided during the scoping phase by the Mining Cadastre generated some queries which, while finally resolved, suggest that the licensing database, and the process of extracting information from the database, require further examination. In seeking to assess whether companies listed by ZRA held mining licences, we were unable to locate information for certain of the companies on the reports provided by the Cadastre. Following a meeting, the particular issues were resolved, but we noted inaccuracies in the preparation of information relating to gemstone companies, due to:</p> <ul style="list-style-type: none"> • the manual effort required to produce the list of these licences; • out of date entries on the licence database; • confusing changes in the system of numbering licences; with reliance upon supplementary; • manual records for interpretation; • In addition during the reconciliation phase, we found that for some of the companies, the accuracy of the data regarding their locations was a big problem. <p>We recommend that the Mining Cadastre should ensure that all records are computerised and maintained up to date; and should ensure that reports of all licensed operators, with appropriate details, can be readily produced for the EITI and other purposes.</p>	Ongoing	The Mining Cadastre has a computerised system and the updating of records to make the information real time is being undertaken and is a continuous process. In addition the Cadastre is working towards establishing an online public portal. A manual filing system is also kept where information that is computerised such as application forms and other data is kept.
<p>Company Accounting</p> <p>During the reconciliation work, we observed that the records kept by some companies, and communication of information within the companies, caused difficulties in producing the information necessary to reconcile payments made to ZRA with the records held by the Agency.</p> <p>We recommend that companies should review their internal processes and procedures between accounting and treasury staff and ensure that bulk and material payments to ZRA are receipted, allocated by tax type and accounted for, including those payments that are made through clearing and forwarding agents. This will significantly help to reduce differences and un-reconciled amounts.</p>	Ongoing	ZEC is continuously urging companies to improve their reporting in terms of the EITI requirement in forums such as the training which is provided to EITI stakeholders of the EITI. ZEC also intends to get the Customs and Clearing Agents involved in the stakeholder's meetings for the reconciliation process.

Recommendation	Implemented (Yes/no/ongoing)	Description of action undertaken
<p>Government Reporting System</p> <p>During the reconciliation work, we observed that government systems are not always set up in such a way that it is easy for government to capture information required for EITI and to report on a timely basis.</p> <p>We recommend that the Government Entities involved, in particular the participating departments in ZRA and MMEWD, should review their systems for recording and reporting information on receipts from extractive companies, so that information can be reported reliably, completely and in a straightforward manner.</p>	Ongoing	ZEC always endeavours to involve government stakeholders in an effort to ensure that the information these Entities provide for EITI reconciliation purposes is easily retrievable, reliable and complete.
<p>ZRA Unallocated Receipts</p> <p>We observed that ZRA often records payments made to ZRA by extractive companies as “Unallocated Receipts”, and that there appears to be inadequate follow up within ZRA of such unallocated amounts, so that they are not identified to the correct company and the correct tax type(s). We were reviewing ZRA records relating to 2010 during our work in late 2012 and early 2013, at which time these receipts were still “unallocated”.</p> <p>It is not unusual that there is difficulty in allocating receipts immediately but there needs to be a robust system in place to follow up all unallocated amounts so that they are allocated on a prompt and timely basis. This would not only eliminate many of the material differences which we saw during the 2010 reconciliation, but is good practice and would assist the ZRA in ensuring that taxes due are collected on a timely basis.</p> <p>We recommend that ZRA examines its procedures and staff training in this area.</p>	Ongoing	<p>ZEC is in constant contact with the Government Entities to improve their systems and procedures in order to make the information easily retrievable, reliable and complete.</p> <p>The Office of the OAG also follows up this issue when following up the discrepancies</p>

Recommendation	Implemented (Yes/no/ongoing)	Description of action undertaken
<p>Customs and Clearing Agents</p> <p>Many of the extractive companies use Customs and Clearing Agents to handle the paperwork associated with importing and exporting goods and materials across the Zambian border. We engaged successfully with companies over the supporting information which they needed to obtain from their Agents for the 2011 reconciliation, and express the view that this process will work well for future reconciliations, without the need to include the Agents directly in the reconciliation.</p> <p>There were, however, difficulties experienced because in a number of instances agents make "bulk payments" to ZRA, and insufficient detail and analysis was provided initially.</p> <p>We recommend that the training for entities in the 2012 and 2013 reconciliation exercises includes coverage of this area for participating companies. There should be consultation with companies over the benefit of inviting the most regularly used Agents to the EITI training, both as specific reconciliation training and also as part of general raising of</p>	Ongoing	<p>The Clearing Agents were not directly engaged or involved in the training that was undertaken for the 2012 and 2013 reconciliation process. However, the ZEITI Secretariat is of the opinion that for future reconciliations, larger Clearing Agents should be engaged at an early stage in the reconciliation process by the companies which utilise their services and they should also be invited to participate in the training that is offered to other stakeholders in the reconciliation process. This will avoid misunderstandings in terms of the information requirements of the companies and would save a lot of time once the reconciliation process commences.</p>
<p>Environmental Protection Fund</p> <p>There were concerns raised by the extractive industry participating companies as to the accuracy of the reporting and accountability of the funds that the mining industry is paying into the Environment Protection Fund.</p> <p>We recommend that the 2012 and 2013 ZEITI reconciliation should include a review of the audited accounts of the Fund and discussion with representatives from the Fund Board over the activities of the Fund, so that there is greater transparency within EITI in this area.</p>	Ongoing	<p>ZEITI Secretariat will try to engage discussions with the Mine Safety Department for a better involvement in the EITI process.</p>

ANNEXES

Annex 1: Reporting template and Supporting Schedule

This Template is addressed only to extractive companies

Data Sheet

Full legal name of the company

Template beneficial ownership declaration form
 Period covered: 1 January 201_ to 31 December 201_

	Name of the Entity	Nationality of the Entity	% Interest	Listed entity (yes/no)	Stock exchange
Gouvernement of Zambia (GRZ)					
ZCCN-IH					
Private Entities *					
			0%	The total should be equal to 100%	

* The declaration below is intended only for the Private Shareholders not listed

Beneficial ownership definition

In accordance with the EITI Standard, Requirement 3.11.d.i, a beneficial owner in respect of a company means the natural person(s) who directly or indirectly ultimately owns or controls the corporate entity.

Private stackholder (1) :

Identity of the beneficial owner	Information about how ownership is held or control over the company is exercised				Date when beneficial interest was	Means of contact
	By shares	By % of voting rights		Other		
1 [Full name as it appears on national identify card] [Date of birth and/or national identify number] [Nationality] [Country of residence]	[number of shares]	[% of shares]	[% of direct voting rights]	[% of indirect voting rights]	[date]	[residential/service address] [other contact details]
[Full name as it appears on national identify card] [Date of birth and/or national identify number] [Nationality] [Country of residence]	[number of shares]	[% of shares]	[% of direct voting rights]	[% of indirect voting rights]	[date]	[residential/service address] [other contact details]

Are any of the beneficial owners a Politically Exposed Person (PEP)** ?

Yes. Name: _____ Public office position and role: _____ Date when office was assumed: / / Date when office was left, if applicable: / /

No.

Private stakeholder (2) :

Identity of the beneficial owner	Information about how ownership is held or control over the company is exercised				Date when beneficial interest was	Means of contact
	By shares	By % of voting rights	Other			
1 [Full name as it appears on national identify card] [Date of birth and/or national identify number] [Nationality] [Country of residence]	[number of shares] [% of shares]	[% of direct voting rights] [% of indirect voting rights]	[Where control over the company is exercised through other means, details should be provided here.]		[date]	[residential/service address] [other contact details]
[Full name as it appears on national identify card] [Date of birth and/or national identify number] [Nationality] [Country of residence]	[number of shares] [% of shares]	[% of direct voting rights] [% of indirect voting rights]	[Where control over the company is exercised through other means, details should be provided here.]		[date]	[residential/service address] [other contact details]

Are any of the beneficial owners a Politically Exposed Person (PEP)** ?
 Yes. Name: _____ Public office position and role: _____ Date when office was assumed: ____ / ____ / ____ Date when office was left, if applicable: ____ / ____ / ____
 No.

Companies should provide details about their beneficial owner(s) here. Where there are more than one owner, the information should be provided for all owners.

** **Foreign PEPs** are individuals who are or have been entrusted with prominent public functions by a foreign country, for example Heads of State or of government, senior politicians, senior government, judicial or military officials, senior executives of state owned corporations, important political party officials.

** **Domestic PEPs** are individuals who are or have been entrusted domestically with prominent public functions, for example Heads of State or of government, senior politicians, senior government, judicial or military officials, senior executives of state owned corporations, important political party officials.

** Persons who are or have been entrusted with a prominent function by an international organisation refers to members of senior management, i.e. directors, deputy directors and members of the board or equivalent functions.

** The definition of PEPs is not intended to cover middle ranking or more junior individuals in the foregoing categories.
